## BERKSHIRE LOCAL TRANSPORT BODY (BLTB)

**REPORT TO:** BLTB **DATE:** 16 March 2017

**CONTACT OFFICER:** Roger Parkin, Interim Chief Executive Slough Borough

Council, lead Chief Executive to the BLTB

### **PARTI**

## Item 6: Airports National Policy Statement - Consultation Response

## **Purpose of Report**

- 1. To report on the timetable and content of the government's Airports National Policy Statement consultation.
- 2. To set out a process and timetable for finalising the LEP's response to this consultation.

#### Recommendation

3. You are recommended to endorse the process for finalising the LEP's response to the government's Airports National Policy Consultation:

The draft version of the LEP's proposed response will be considered by:

- BLTB on 16 March
- TVB LEP Forum on 21 March

The final version will be presented to the LEP Forum for approval at its meeting on 24 May.

4. You are asked to comment on the content of the draft response set out in Table 1 below.

## Other Implications

#### Financial

5. There are no direct financial implications of this report for Berkshire Local Transport Body.

## Risk Management

6. There are limited risks for Berkshire Local Transport Body associated with the government's Airports National Policy Statement consultation process. It is a public process, and it is open to anyone and everyone to respond. The responsibility for a final decision on airport capacity expansion rests with the government. Even if the National Policy Statement identifies Heathrow as the preferred site, Heathrow Airport Limited will embark on a two-year process to secure a Development Consent Order. This process is itself subject to public consultation and examination-in-public.

## Human Rights Act and Other Legal Implications

- 7. Slough Borough Council will provide legal support for the BLTB, should any questions arise.
- 8. In the event that legal challenges to the Airports National Policy Statement arise, it will be the government whose decision is challenged.

## Supporting Information

- 9. The government published its <u>draft Airports National Policy Statement</u><sup>1</sup> on 2 February 2017. The consultation period runs for 16 weeks and closes at 11.45pm on 25 May.
- 10. This report sets out the LEP's approach to responding to the consultation and invites further contributions from members of the Thames Valley Berkshire LEP Forum and the Berkshire Local Transport Body for incorporation in the final version.

The draft version of the LEP's proposed response will be considered by:

- BLTB on 16 March
- TVB LEP Forum on 21 March

The final version will be presented to the LEP Forum for endorsement at its meeting on 24 May.

The consultation process includes a series of <u>local meetings</u><sup>2</sup> and a regional meeting (at Reading Town Hall on 12 April, you can register to attend by following the <u>link</u><sup>3</sup> here). The LEP's response is one of many ways in which businesses, residents, councils and other organisations can respond. For more detail, please go to <a href="https://www.gov.uk/government/consultations/heathrow-expansion-draft-airports-national-policy-statement">https://www.gov.uk/government/consultations/heathrow-expansion-draft-airports-national-policy-statement</a>

11. The process invites written responses to 9 questions. The questions are reproduced below, with an outline of the planned LEP responses.

**Table 1: Outline Response**

Heading	Question	Outline response
	Please tell us	are the principal reason why inward investors choose to
	your views.	locate in TVB and they are a crucial underpinning of ongoing re-investment" (p17)
		"However, the transport and communications infrastructure on which we rely is simultaneously a local, national and international resource. It is very congested. This in turn is threatening to undermine our intrinsic growth potential. It is therefore essential to invest in it and also to encourage local sustainable transport networks that promote active travel on foot, on bicycle and on public transport." (p13)
Question 2: The Government'	Please give us your views on how best to address the issue	Thames Valley Berkshire LEP maintains that none of these are bad options, but that expansion at Heathrow is a superior option to expansion at Gatwick.
s preferred scheme: Heathrow Northwest Runway	of airport capacity in the South East of England by 2030. This could	Reference to "London Heathrow Economic Impact Study" September 2013 by Regeneris for "Western Wedge" LEPs <sup>5</sup> and its main findings that:
Runway	2030. This could be through the Heathrow Northwest Runway scheme (the Government's preferred scheme), the Gatwick Second Runway scheme, the Heathrow Extended Northern Runway scheme, or any other scheme.	<ul> <li>At present (2013) the activity at Heathrow Airport supports 120,000 jobs and £6bn in economic output across the western wedge economy; a further 170,000 to 230,000 jobs are dependent on the good air connections offered by Heathrow.</li> <li>By 2040 an extra 35,000 jobs could be created if Heathrow expands compared to a do-nothing option and the region would see annual GVA boosted by £3 billion as a result of the extra activity at Heathrow.</li> <li>The better air connections could deliver business productivity benefits of £230m to £300m pa from reduced delays and more frequent services, with around 50 additional long and short haul services offered. The expansion of Heathrow would help secure the many jobs in international firms clustered around the airport.</li> <li>We further conclude that there are significant disadvantages for the Heathrow Extended Northern Runway scheme when compared to the Northwest Runway in respect of the surface access proposals, in particular access to the Great Western mainline.</li> <li>We have also concluded that the surface access proposals for the Gatwick option are over-reliant on routes via London. There are no significant investment proposals to expand</li> </ul>
Question 3: Assessment principles	The Secretary of State will use a range of assessment principles when considering any application for a Northwest Runway at	capacity on east-west access routes.  Thames Valley Berkshire LEP supports the proposed approach of comparing the "potential benefits, including the facilitation of economic development (including job creation) and environmental improvement, and any long term or wider benefits" with the "potential adverse impacts (including any longer term and cumulative adverse impacts) as well as any measures to avoid, reduce or compensate for any adverse impacts." (paragraph 4.4 of the draft NPS)

<sup>&</sup>lt;sup>4</sup> <a href="http://thamesvalleyberkshire.co.uk/Strategic">http://thamesvalleyberkshire.co.uk/Strategic</a> <a href="http://thamesvalleyberkshire.co.uk/Portals/0/FileStore/StrategicInfrastructure/St Heathrow%20Economic%20Impact%20Assessment%20-%20Final%20Report.pdf

Heading	Question	Outline response
	Please tell us your views.	
Question 4: Impacts and requirements	The Government has set out its approach to surface access for a Heathrow Northwest	Thames Valley Berkshire LEP supports the government's objective, "to ensure that access to the airport by road, rail and public transport is high quality, efficient and reliable for both passengers and airport workers who use transport on a daily basis." (para 5.5 of the draft NPS)
	Runway scheme. Please tell us	Transport requirements generated by airport expansion
	your views.	Thames Valley Berkshire LEP is aware that not all road and rail users who travel towards, or away from, the airport are passengers or airport workers. The existing road and rail networks help meet a wide variety of non-airport transport needs. We ask that the transport impact assessment (including the air quality impact assessment) takes full account of these non-airport journeys in both the "2-runway" and "3-runway" states.
		This point is raised by the requirement set out at paragraph 5.15 of the draft NPS, "The applicant should demonstrate in its assessment that the proposed surface access strategy will support the additional transport requirements generated by airport expansion."
		This point is engaged again in paragraphs 5.18 and 5.19 of the draft NPS which refer to "the upgrading or enhancing of road, rail or other transport networks or services which are physically needed to be completed to enable the Northwest Runway to operate" either prior to opening or as "additional [runway] capacity becomes fully utilised". These paragraphs go on to introduce the possibility that some of these enhancements might be joint funded by the applicant and the government.
		We suggest that some care will need to be taken in defining the phrases "additional transport requirements generated by airport expansion" (5.15) and "where a transport scheme is not solely required to deliver airport capacity" (5.18, 5.19) in order to distinguish between:
		<ul> <li>the demands already in the wider economy of London and the "Western Wedge";</li> <li>the likely increase in demand from general economic</li> </ul>
		<ul> <li>the likely increase in demand from general economic growth; and</li> <li>the likely increase in demand created by airport expansion.</li> </ul>
		We consider it would be a perverse outcome if the applicant was required to mitigate adverse impacts that arise from demands already in the wider economy, or mitigate adverse impacts that result from the projected future growth of the wider economy.
		Western Rail Link to Heathrow
		Thames Valley Berkshire LEP argues that the case for investment in the Western Rail Link to Heathrow is clear and based on the needs of a <b>two-runway airport</b> . This view was endorsed by the Airports Commission. (see <u>Final Report</u> <sup>6</sup> , para

Heading	Question	Outline response
		8.15, p 155).
		The scheme is included in the National Infrastructure Delivery Plan 2016-21 <sup>7</sup> (para 5.8, page 41) under the heading "Projects in Development", with the suggestion that construction might begin "early in CP6 (2019-2024)".
		In launching the consultation, the Secretary of State said "We are also bringing forward plans to deliver western and southern rail access to the airport as quickly as possible to provide greater flexibility, accessibility and resilience for passengers" (Hansard Vol 620, 2 February 2017 <sup>8</sup> ).
		We urge the government to consider how the commitment to this scheme can be linked to the operation of a two-runway airport and not as a condition of expansion to a three-runway airport.
		Other Surface Access Projects
		Thames Valley Berkshire LEP also supports the development of other major surface access schemes that will contribute to the reduction of road journeys. We support  Southern Rail Access to Heathrow as recommended by the Airports Commission and taken up by Network Rail; and Slough Mass Rapid Transit we have invested Local Growth Funds in this scheme in Slough and we support the ambition to extend it onto the airport.
		Duty to Co-operate
		Thames Valley Berkshire LEP notes the reference in the draft NPS to Heathrow Airport Transport Forum (para 5.8) and to the principles set out in the Aviation Policy Framework. The LEP has joined the Heathrow Strategic Planning Group <sup>9</sup> (which includes LEPs and Local Authorities neighbouring the airport) in order to fulfil its Duty to Co-operate both with Heathrow Airport Limited, and with the similarly impacted authorities, in producing a co-ordinated response to the Development Consent proposals as they emerge.
		We suggest that the applicant be encouraged to use the Heathrow Strategic Planning Group in order to meet the expectation that "the applicant should consult Highways England, Network Rail and highway and transport authorities, as appropriate, on the assessment and proposed mitigation measures." (paragraph 5.9 of the draft NPS) and similar expectations at paragraphs 5.10 and 5.11 of the draft NPS.
		Monitoring and Enforcement

<sup>&</sup>lt;sup>9</sup> <u>http://www.heathrowstrategicplanninggroup.com/</u>

Heading	Question	Outline response
		Thames Valley Berkshire LEP agrees that the Surface Access Strategy should "reference the role of surface transport in relation to air quality and carbon" (para 5.8) and that it "must contain specific targets for maximising the proportion of journeys made to the airport by public transport, cycling or walking" (para 5.8) and that it "should also contain actions, policies and defined performance indicators for delivering against targets" (para 5.8). However, we are not convinced that Airport Transport Forum is the right body to "oversee implementation of the strategy and monitor progress against targets alongside the implementation and operation of the preferred scheme" (para 5.8). This reservation is made because the Airport Transport Forum is not independent of the applicant, and has no status or standing to enforce any agreements.
		Thames Valley Berkshire LEP welcomes paragraphs 5.16 and 5.17 of the draft NPS which set out specific targets and expectations on recording and reporting performance relating to some elements of the surface access strategy. We suggest that these be re-drafted to give better coverage of the whole of the proposed surface access strategy, and include some indication of how an enforcement regime would work, including potential sanctions. (see also paragraph 5.37).
		Paragraph 5.28 quotes the Airports Commission's recommendation that "Heathrow Airport should be held to performance targets" for public transport use, but this idea is not developed in the draft NPS.
		We suggest that a lead Local Authority be identified to take on the monitoring and enforcement role, acting alone, or in concert with other local authorities, possibly through the mechanism of the Heathrow Strategic Planning Group mentioned above.
Question 5: Impacts and requirements	The draft Airports National Policy Statement sets out a package of supporting measures to mitigate negative impacts of a	Thames Valley Berkshire LEP has identified the Western Rail Link to Heathrow (WRLtH) scheme as its number one transport infrastructure priority, and has been promoting this investment on the basis of a two-runway Heathrow. The Airports Commission supported the view there was a need for this scheme whether or not Heathrow expansion was allowed to proceed (see Final Report <sup>10</sup> , para 8.15, p 155).
	Heathrow Northwest	We do not regard WRLtH as a mitigation measure for the Northwest Runway Scheme.
	Runway scheme. Please tell us your views.	We fully support the ambition of achieving a three-runway airport with "no net increase in road traffic": through the work of the Heathrow Strategic Planning Group <sup>11</sup> we will_work with Heathrow Airport Limited, national agencies and local authorities to deliver credible plans for Southern Rail Access to Heathrow, Slough Rapid Transit and other surface transport interventions that contribute to the goals of modal shift away from cars and improving air quality.

	out?	(which includes LEPs and Local Authorities neighbouring the airport) in order to fulfil its Duty to Co-operate both with
		Heathrow Airport Limited, and with the similarly impacted
		authorities, in producing a co-ordinated response to the
		Development Consent proposals as they emerge.
		We suggest that the applicant be encouraged to use this group
		in order to meet the expectation that "During any pre-
		application discussions with the applicant, the local planning authority should" (para 5.112 of the draft NPS).
	In particular, please tell us	Transport requirements generated by airport expansion
	your views on:	Paragraph 5.32 of the draft NPS says the applicant's
	5.1. Air quality	environmental statement should assess "Any significant air
	supporting measures	quality effects, their mitigation and any residual effects, distinguishing between those applicable to runway
	measures	construction and operation stages and taking account of the
		impact that the project is likely to cause on air quality arising
		from road and other surface access traffic".
		As we have noted above, we suggest that some care will need
		to be taken in defining the phrase "the impact that the project is likely to cause on air quality arising from road and other
		surface access traffic" in order to distinguish between:
		<ul> <li>the demands already in the wider economy of London and the "Western Wedge";</li> </ul>
		<ul> <li>the likely increase in demand from general economic growth; and</li> </ul>
		the likely increase in demand created by airport expansion.
		Monitoring and Enforcement
		Paragraphs 5.34 – 5.40 describe how the applicant might
		make proposals to mitigate any potential adverse effects on air
		quality. There are many overlaps with the suggested surface access mitigation interventions.
		We suggest that a lead Local Authority be identified to take on
		the monitoring and enforcement role, acting alone, or in
		concert with other local authorities, possibly through the mechanism of the Heathrow Strategic Planning Group
		mentioned above.
	5.2. Noise	With respect to noise impacts that are generated by surface
	supporting measures	access arrangements, we repeat the comments made earlier about taking care to isolate the impact of airport expansion
		from other sources and causes of noise nuisance; and the
		need to create an appropriate monitoring and enforcement arrangements.
