1 Introduction

1.1 Overview

1.1.1 This Annual Monitoring Report covers the period from 1st April 2022 to 31st March 2023, and meets the statutory duty for continuous monitoring of important information.

1.1.2 The Annual Monitoring Report reports on key information relating to planning policy issues in Slough, in terms of the effect of adopted policies. It provides monitoring information on housing, employment, retail and town centres and built and natural environment. The report also relates to our emerging Local Plan.

1.1.3 The document is set out in topic-based sections including housing, retail, employment, environment. Each section has some key facts, discusses key issues and then the relevant indicators that have been monitored.

1.1.4 For further information on planning policy for Slough, please visit the [Council's website](#).

1.2 Adopted and emerging Planning Policy

1.2.1 Slough's Local Development Plan consists of the Core Strategy (adopted in December 2008); Site Allocations (adopted in 2010), Saved Policies from the Local Plan 2004, and the Proposals Map (2010). There are also saved policies from the Minerals and Waste Plans. These will remain the statutory Development Plan until the new Local Plan reaches adoption.

1.2.2 Please refer to Section 10 for the Slough new Local Plan.

1.3 Setting the Scene

1.3.1 Slough is highly urbanised and has a small geographical area of 32.5 km².

1.3.2 Slough's population at the time of the 2021 Census was 158,500 – an increase of 13.0%, from around 140,200 in 2011. This growth is markedly higher than the national average of 6.6%. This confirms that there are a greater number of residents in the borough than has previously been included in recent [ONS estimates](#) (149,577 as of mid-2020).

1.3.3 Slough is one of the smallest Councils by area and one of the most densely built-up areas in the country. There is shortage of land for new development (Centre for Cities, 2020).

1.3.4 There are now 52,423 households in Slough containing at least one person – a growth of only 3.3% on 2011, compared to 6.1% in England and Wales. Slough also saw England's largest percentage-point rise in the proportion of households including a couple with dependent children (from 23.3% in 2011 to 27.5% in 2021).

1.3.5 Slough is the third most densely populated local authority in the Southeast, with 4,871 usual residents per square kilometre (48.7 per hectare compared to 45.8 in 2011). In the latest census, around 87,400 Slough residents said they were born in England. This represented 55.1% of the local population. The figure has risen from around 83,200 in 2011, which at the time represented 59.4% of Slough's population. (India was the next most represented, with (10.8%), and Pakistan (9.1%).

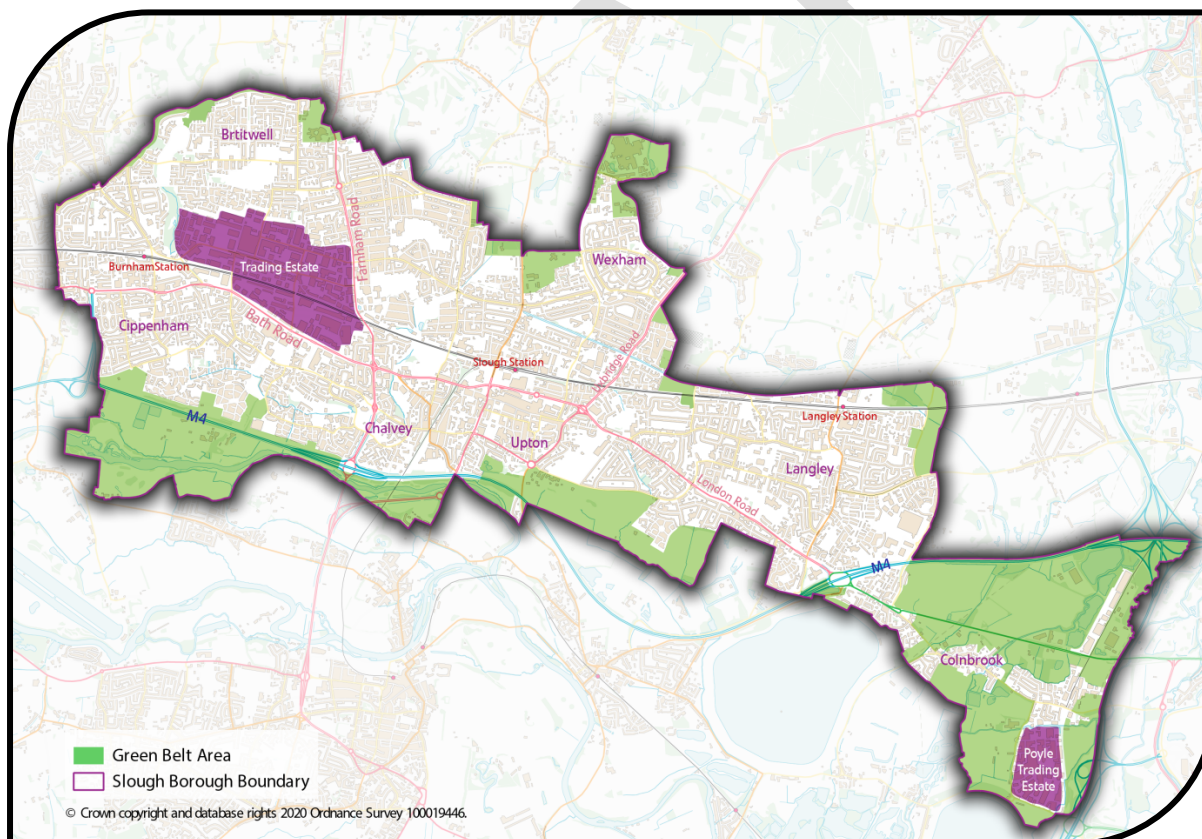

1.3.6 In addition to the town centre, there are two district centres at Farnham Road and Langley. These are supplemented by a network of neighbourhood centres. There are three retail parks which are concentrated in the west and centre of the Borough.

1.3.7 There are three railway stations on the Great Western Railway line: Burnham, Slough (town centre), and Langley (Figure 1 below), all of which are on the Elizabeth line.

1.3.8 The M4 motorway (Jn 5-7) runs along the southern boundary of Slough acting as an east west bypass, with the M25 (Jn 15) easily accessible from the eastern boundary. The M4 creates a barrier to the land to the south. The A4 is the main spine road through the town but is so congested at times that it does not cater for through traffic. The main north south route through Slough is the A355 which goes towards Windsor in the south and Beaconsfield/M40 in the north. The A412 leads towards Uxbridge.

1.3.9 One of Slough's biggest advantages is its proximity to Heathrow airport. This not only provides a lot of employment on site but is a big boost to the local economy. The airport also creates some environmental problems and can add to congestion, particularly in the eastern part of the Borough.

Figure1: A map of Slough

2 Housing

2.1 Key facts

- Slough has one of the youngest populations in the country (average age 34) with a high proportion of children (29% children aged 0-17) and families who will need new homes in the future (only 10% 65 or over).
- Slough has some of the highest levels of overcrowding with each person having on average 27.2 m² of space in a home compared to an average of 36.5m² in other towns and cities.
- Slough saw the South East's largest percentage-point rise in the proportion of privately rented homes (from 24.3% in 2011 to 30.7% in 2021).

2.2 Housing issues

2.2.1 There is a shortage of land for housing. Slough's trajectory continues to show that Slough, over the next 18 years, will have at least a 5,000-housing shortfall compared to current housing need figures. As part of the initial stage of Local Plan preparation further work will be undertaken to confirm the shortfall figure.

2.2.2 Sites with potential for redevelopment for residential use do not always come forward as expected and approved developments do not always get built out at the rate expected. Despite the strong demand for new homes the supply does not meet the Borough needs in terms of numbers and type of home. Economic viability issues usually arise in connection with redevelopment sites i.e. those on previously developed land (brownfield sites). Measured over several years and on average the number of homes granted consent has increased at a greater rate than completion of new homes. The Council is primarily dependent upon firstly the private sector to apply for planning permission and secondly wider economic conditions that encourage landowners to sell land and developers to build out schemes with consent.

2.2.3 There is a significant need for affordable housing and for a range of house types including in particular family housing and homes with gardens. The vast majority of housing completions in the recent past have been in the form of flatted developments.

2.3 Meeting housing need

2.3.1 Housing targets for the Local Plan and the 5-year housing land supply are calculated using the 2021 Standard Methodology published in the National Planning Policy Framework and Planning Guidance. This takes account of household projections and affordability ratios published by the Government to establish a Local Housing Need figure. Every year, new affordability ratios are produced and as a result the local housing need figure changes.

2.3.2 The Local Housing Need figure for Slough applied to the 22/23 housing calculation is 847 homes per annum (average). For this year, 23/24, the latest housing need figure of 825, released in April 23, will be used. When applied to the new Local Plan period, which extends to 2040/41, the total housing need figure as at April 2023 is 16,100 homes.

2.4 Housing delivery test

2.4.1 In 2018, the "Housing Delivery Test" (HDT) was introduced into the planning system as part of the new National Planning Policy Framework. The Housing Delivery Test (HDT) measures net

additional dwellings provided in a local authority area against the homes required. The methodology for calculating the Housing Delivery Test measurement is set out in the Housing Delivery Test Measurement Rule Book, and the Department for Levelling Up Housing and Communities publish the HDT result for each local planning authority in England annually usually in November. However, no announcement has been made since January 2022.

2.4.2 The results of the 2021 Housing Delivery Test which were published in January 2022 show that over the previous three years housing delivered in Slough was 67% of the required level. This means that the 'presumption in favour of sustainable development' applies when deciding planning applications as 67% falls below the current Test threshold of 75%. In 2021 Slough was just above the threshold. Further implications of the test, but no different to last year, are the need to have a 20% rather than a 5% buffer added to the Borough housing need/requirement figure. And for a Housing Delivery Action Plan, prepared in line with national guidance, to be in place (see below section 2.9).

2.5 Housing completions

2.5.1 Table 1 below shows the rate of net housing completions during the Local Plan period since 2006. See table C in the Appendix for the relationship to housing targets.

2.5.2 In 2022/23, there were 322 net housing completions in Slough. This figure is much less than the annual average over the last 4 years even though it includes continuing completions on the large Horlicks Quarter site. All of the 322 homes except 28 were built on sites of 10 or more homes. The 28 figure is lower than average (over the past few years) but there are over 104 homes under construction on small sites.

2.5.3 Of the total 325 gross completions, 4 homes were created by conversion of existing homes and 97 (30%) were from a change of use. 3 homes were lost through conversion or demolition. A list of sites with completions is in Appendix (Table A).

2.5.4 At the end of March 2023, there were 1121 dwellings under construction including over 300 on the first phase of the Horlicks site. This is a bit less than each of the last 2 years but higher than average over the last 6 years. There were 2659 dwellings with planning consent (including outline permissions) but not yet started. Over 700 of that figure is phase 2 of the Horlicks Quarter development which is expected to start in 2024. The number of homes not started is a bit less than each of the last two years. But it should be noted 1,000 of the 'not started' figure is the residential element of the former Akzo Nobel site which is now most unlikely to progress.

Table 1: Housing net completions since 2006

Year	Past Completions	Cumulative completions
2006/07	409	409
2007/08	849	1,258
2008/09	595	1,853
2009/10	275	2128
2010/11	249	2,377
2011/12	246	2623
2012/13	182	2805
2013/14	396	3201
2014/15	507	3708
2015/16	789	4497
2016/17	521	5018
2017/18	846	5864
2018/19	534	6398
2019/20	503	6901
2020/21	501	7402
2021/22	532	7934
2022/23	322	8256

2.6 Housing trajectory

2.6.1 The Housing trajectory (Table D in Appendix 1) sets out an estimate of housing supply in the Borough over the new Local Plan period 2020/21-2040/41. It also states the current Local Housing Need figure. That figure is greater than the expected future supply, so the difference means there will be a shortfall of new housing within the Borough in future years as referred to in para 2.2.1 above and 2.6.3 below.

2.6.2 The trajectory estimate is based upon the 5-year housing land supply sites (see below), other developments with consent and sites the Council assess as likely to or have a reasonable prospect of coming forward taking account of the 2010 Site Allocations, emerging Local Plan,

existing planning policies and known landowner/developer interest. The trajectory considers these principal sources of supply:

- Sites with Planning consent for residential units, taken from data in the Council's planning records (hard commitments). This includes full, outline and reserved matters consent plus permitted development and permission in principle.
- Sites allocated for development in the existing Local Plan or Site Allocations Development Plan.
- Sites likely to come forward for development having considered current undecided planning applications, pre apps, Council development/land proposals, the 'call for sites' exercise in 2016 and the Spatial Strategy.
- An estimate for new homes built on small sites (likely to have fewer than 10 homes).

2.6.3 The trajectory figures take account of the likelihood that not all the developments/sites used to compile it will come forward - known as discounting. Before discounting, the trajectory exercise listed sites that could accommodate over 11,000 homes. After discounting this figure, it reduces to about 9,500 homes. Comparing the latter figure to the current Local Housing Need figure of 16,100 indicates a shortfall of well over 5,000 homes. For the latter years of the new Local Plan period, some unidentified sites are expected to come forward but there is no evidence to suggest they would make up the estimated shortfall.

2.6.4 The inputs to the trajectory and housing need figure do vary over time. So the trajectory and associated calculations are reviewed each year at least.

2.6.5 The 'hard commitments' – new homes with planning consent are listed in the Appendix (table B). The list is also the basis of the 5-year land supply figure, see below, but certain sites are excluded to accord with Government guidelines.

2.7 Five-year housing land supply

2.7.1 The National Planning Policy Framework (NPPF para 68) requires Local Planning Authorities to identify a supply of specific deliverable sites sufficient to provide five years' worth of housing against their housing requirement or Local Housing Need (LHN) figure with an additional buffer of 5% to ensure choice and competition in the market for land." However the Housing Delivery Test result for Slough as outlined above requires a 20% buffer to be applied.

2.7.2 Slough's current Local Housing Need figure is equivalent to 825 net additional dwellings per year; this is derived from the standard methodology in the NPPF as stated above.

2.8 Five-year Housing land supply calculations

5 year housing land supply	
Annual average Local Housing Need	825
Local Housing Need x 5 years	4125
5 year need figure inclusive of 20% buffer	4950
Annual Local Housing Need inclusive of 20 % buffer (4950/5)	990
5 year identified supply	2607
Number of years supply (2607/990)	2.63
Rounded 5 year land supply	2.6 years

2.8.1 The table above shows that Slough has 53% of the Local Housing Need figure (inclusive of buffer) which equates to a 2.6-year supply as of 1st April 2023. Consequently, Slough does not have a five year supply of new housing as defined by the Government. To strictly align with the

2.8.2 definition, this figure currently excludes applications with outline permission or waiting for planning obligations to be signed or sites allocated for development in the Local Plan.

2.8.3 Last year the 5 year supply figure was 2.1 years. The Council intends to review the way it calculates the figure taking account of best practice and what other local authorities do. This might result in a few more sites being included.

2.8.4 Where Local Planning Authorities cannot demonstrate a five year supply of deliverable housing the development plan policies are considered to be out of date. This means that the 'tilted balance' must be applied in determining planning applications for housing development. This requires local planning authorities to apply the 'presumption in favour of sustainable development' which is set out in paragraph 11d of the NPPF. This states that applications should be granted planning permission unless:

- i) the application of policies in this Framework that protect areas or assets of particular importance provides a clear reason for refusing the development proposed, or
- ii) any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole.

2.9 Housing delivery action plan

2.9.1 A Housing Delivery Action Plan was produced in July 2019 and published on the Council's

website. The Plan identifies that many of the reasons for under delivery are outside the control of the Council and it sets out various actions in order to try to improve housing delivery and meet the Housing Delivery Test in future years. These reasons and actions are still substantially relevant. An updated Plan will be produced in the near future when resources are available.

2.10 Type of Housing

2.10.1 The results of monitoring for 2022/23 show that 6% of completions were houses and 94% flats or maisonettes.

2.10.2 Table 2 below shows past trends.

Table 2: Percentage of Houses and Flats completed since 2016.

Year	% Flats	% Houses
2015/16	66	34
2016/17	67	33
2017/18	75	25
2018/19	83	17
2019/20	90	10
2020/21	90	10
2021/22	94	6
2022/23	94	6

2.10.3 The predominant dwelling type in Slough is traditional two or three bedroom houses. However, as indicated above, most new homes are flats and increasingly so in recent years. Most flatted schemes are a mixture of one and two bedroom properties with a few three bedroom homes.

2.10.4 The predominance of flats reflects, in part, the effectiveness of the policy in the Core Strategy that seeks to firstly direct new development to the town centre and other urban areas, where flats are generally more acceptable, and secondly ensuring that development in the suburban areas consists predominantly of family housing. Since 2014, the relaxed planning regime under Permitted Development rules (also known as Prior Approvals) for change of use from offices to residential has also contributed to the predominance of flats in the centre of Slough.

2.10.5 Last year 97 of total home completions were a change of use from offices. 95 were via the Permitted Development rules. Both figures are less than previous years. Whilst there is a need for all dwelling types, the need for family homes is not being met as well as that for small homes. And the need for traditional family homes with gardens is met even less.

2.10.6 The predominance of flats is likely to continue as very few green field sites are likely to come forward for development in the near future. It is much easier to insist on houses for those sites. And viability issues around redevelopment of existing properties will remain. Plus the relaxed Permitted Development (PD) rules, in a revised form, still exist. Change of use to offices under PD rules are not likely to be as high as the past but other uses can now change to residential use under the recently revised rules. Development via PD rules results in lost employment or retail space and prevents the Council controlling the mix of homes (number of bedrooms per flat) and

seeking affordable housing.

2.11 Previously developed land completions

2.11.1 100% of the gross housing completions in 2022/23 were on previously developed sites (brownfield). This figure tends to fluctuate over the years depending upon which sites are coming forward but last year's figure is broadly consistent with the last 5 years.

2.11.2 Table 3 below shows that the trend is most housing completions are on previously developed land and this has never fallen below 50 percent. This trend is likely to continue as few greenfield sites are being developed now. And as highlighted under type of housing most development takes place in the centre of Slough.

DRAFT

Table 3: Previously Developed Land completions

YEAR	Total Gross Completions	Total Gross PDL Completions	% PDL
2022/2023	325	325	100%
2021/2022	541	508	98%
2020/2021	510	510	100%
2019/2020	514	511	99%
2018/2019	585	585	100%
2017/2018	861	804	93%
2016/2017	598	484	81%
2015/2016	782	536	68%
2014/2015	599	301	50%
2012/2013	190	95	50%
2011/2012	258	175	67%
2010/2011	262	201	77%
2009/2010	285	172	60%
2008/2009	632	198	69%
2007/2008	917	896	98%
2006/2007	475	466	98%
2005/2006	533	498	93%
2004/2005	867	500	58%

2.12 Housing mix

2.12.1 As most new homes were flats, one and two bedroom homes predominate with some studios and some 3 bedroom flats.

2.12.2 It should be noted that 30% of new home completions came via the prior approval/permitted development process for change of use. It is likely that most of these homes would have been 1 or 2 bedroom homes including some bedsits. However applications under the Permitted Development process do not have to include details of mix so precise details cannot easily be gained.

2.12.3 The lack of new family sized housing coming forward in Slough provides further justification

for the Local Plan Spatial Strategy of protecting the existing stock in the suburbs, seeking family homes within the town where feasible and promoting cross border development, such as the northern expansion of Slough in the form of a garden suburb to help rebalance the housing market.

2.13 Affordable housing

2.13.1 Affordable housing is essential in order to meet local housing needs. Affordable housing can be delivered by a combination of house building by the Council, registered providers (mostly housing associations) and private developers. For the latter, affordable housing is normally provided through the planning process by securing a proportion of dwellings on private development sites as affordable housing under Section 106 planning obligations.

2.13.2 Core Policy 4 in the Core Strategy DPD 2006-2026 requires that 30-40% affordable housing on sites of 15 homes or more primarily on site or for smaller sites (14-24 homes) financial contributions for the Council to fund affordable homes elsewhere in the town.

2.13.3 183 new build dwellings were in the affordable category in 2022/23. This is the largest number since 2015 and represents 57% of total net completions. All 183 were secured via the planning system. All are flats and most were on the Horlicks Quarter site.

2.13.4 The supply of affordable homes is affected by a number of factors. Firstly, the availability of Council or Housing Association land and funds to build themselves. Secondly, the scope to insist on affordable housing via planning obligations on private development sites. The latter is affected by whether or not large enough sites come forward in any one year and viability of redevelopment on brownfield sites. Applications now come forward with viability studies which usually show that it is not possible to provide the full policy compliant quota of affordable housing.

2.13.5 The second factor limiting supply is that the Council is unable to get contributions from change of use schemes that have come forward under the Prior Approval/Permitted Development process. Thirdly the ability of Housing Associations to buy homes, offered by private developers under planning obligations, is limited. Government grant funding for Housing Associations purchasing planning obligation housing is not now available. Homes England funding for affordable housing is also limited but is being used on the Horlicks Quarter development.

2.13.6 Regarding affordable housing via planning obligations some contributions are financial rather than homes built on site. Those contributions, for the Council to use on housing, are included in the Planning Obligations section below.

2.14 Self-build register

2.14.1 As required by Planning Practice Guidance (PPG), since 1 April 2016 the Council keeps a custom and self-build homes register, details of which are publicised on the Council's website.

2.14.2 The register holds information on individuals and associations of individuals who are seeking to acquire serviced plots of land. The PPG encourages Local Planning Authorities to publish headline data in their AMR on the demand for self-build or custom housebuilding.

2.14.3 The Council has not set any local eligibility criteria or fees for going on to or staying on the register. As such anyone going on to the register would be on 'Part 1'. There are no financial checks completed at this stage to indicate whether or not people registering can realistically fund

the property they are indicating they would like.

2.14.4 The number of individuals on the self- build register at July 2023 is 241.

2.14.5 For more information on how to join the register please visit [Register for a self-build home – Slough Borough Council](#)

2.15 Brownfield land register

2.14.6 In accordance with the Town and Country Planning (Brownfield Land Register) Regulations 2017 and the Town and Country Planning (Permission in Principle) Order 2017 which came into force in April 2017, the Council is required to prepare and maintain a register of brownfield land that is suitable for residential development.

2.14.7 Regulation 17 of the Town and Country Planning (Brownfield Land Register) Regulations 2017 requires local planning authorities to update the information relating to existing entries in their registers at least once a year and that it may consist of two parts:

Part 1 - all sites which are 'suitable', 'available', and 'achievable' for residential development which could be delivered within 15 years; and

Part 2 - any sites which are given 'permission in principle'. Inclusion on part 2 would grant permission in principle for residential development (the scale to be determined by the Council) and the landowner/developer would have to apply for 'technical details consent' before any development could commence.

2.14.8 Brownfield sites that meet the relevant criteria must be entered in Part 1 of the Register. There are currently no sites classified as Part 2 on the register. The Register can be found on the [Slough website](#)

3 S106 planning obligations

3.1.1 Details on Section 106 planning obligations for 2022/23:

- 11 new planning obligations signed (excludes variations)
- Affordable housing via planning obligations: 183 units completed
- Total financial contributions £675,335 made up of
 - Affordable Housing: £481,053
 - Infrastructure: £194,282

The above relates to all obligations not just those related to housing. The total sum received for both infrastructure and affordable housing is much lower than 21/22 (£ 6,342,642). However that figure was exceptionally high. And it should be noted that the money received in the first half of 2023/24, (approx. £ 2.5 m) is already substantially higher than the total for last year. The annual average figure over the last 10 years is over £ 3m per year.

4 Employment

4.1 Key facts

- Slough Trading Estate Limited has 97.3% Occupancy, and the second-largest hub of data centres in the world (SEGRO 2022 Annual Report).
- Slough is an economic powerhouse.
- Slough hosts a number of corporate headquarters and has one of the highest business start-up rates in the country.
- Slough residents earn £27.8 less per week than the regional average.
- There is a gap of £84 between Slough residents (£657.5) and all those who work in Slough (£741.5) (Nomis Labour Market Profile, Jan 2023 (data for 2022)).
- Slough has a larger proportion of people claiming unemployment benefit (4.9%) than the South East and England averages (Nomis Labour Market Profile, June 2023)
- 6.2% unemployment rate (Nomis, December 2022)

4.2 Employment issues

4.2.1 Slough is an economic powerhouse but it doesn't always benefit as much as it should from all of this economic activity. Slough's residents have lower paid salaries when compared to those who are commuting into the Borough who have higher paid salaries.

4.2.2 Without the expansion of Heathrow Airport, which would have provided a significant boost to the local economy, the only major opportunity for employment growth is new offices in the town centre. However, the stock of office buildings in the town has reduced considerably in recent years primarily as a result of change of use to residential use. Also due to the covid pandemic the nature of how some companies are operating is changing. Combined with staff working remotely demand for office space is reduced.

4.2.3 Because of current uncertainty, it is not possible to confidently predict number of jobs required to support the Slough economy. But the plan continues to aim to provide an additional 15,000 jobs in order to meet the needs of the growing resident workforce. Further evidence is required for employment need and this will be produced.

4.2.4 There is a significant demand for land for warehousing and data centres in Slough. This together with the need to plan for additional jobs means land is needed for new industrial/business floorspace – either redevelopment of existing employment/business use land or greenfield land. And as stated above there is also a shortage of land for much needed housing. Much new housing in recent years has been on former employment land. Competition for land is high so land/property values have risen in recent years.

4.2.5 [The Centre for Cities reports](#) on Slough, extract from their research on unemployment levels in the Borough is below.

The chart below compares inflation to changes in wages on a city-by-city basis, and show what this means for the 'real' wage in each place - i.e. whether the average person can buy more or less with their wages as a result of price and wage rises.

What's the impact of rising prices on money in people's pockets?

In July 2023, national inflation was **6.8%**.

In **Slough**, nominal wages grew by **6.7%** over the same period (year-on-year).

This translates into a **-0.1%** change in real wages in **Slough**, assuming average prices grew at the national inflation rate (year on year).

But the cost of living crisis started at the beginning of 2021.

Comparing current wages to their January 2021 level shows that workers living in **Slough** are still on average **£65.9** a month poorer than they were when the crisis started.

Monthly wages adjusted to inflation and real wage growth (year on year)

Job postings: Indeed UK, Job postings February 2020 - July 2021.

Share of population with high-level qualifications: ONS, Annual Population Survey, resident analysis. Department for the Economy (DfE NI), District Council Area Statistics for Belfast.

Wages adjusted to inflation: ONS, HMRC (PAYE). Loss measured in January 2021 prices.

4.3 Completed Employment floorspace

4.3.1 The monitoring shows that there was a net gain of 3,628 square metres of employment floor space in 2022/23. Gross new floorspace was 55,719 sqm.

4.3.2 Of new gross floorspace, the dominant uses are data centres (36,054 sqm) and warehousing/general industrial (18,258 sqm). Two office buildings have been lost to residential use (6,572 sqm). One small office has been lost to education use. The new data centres and warehousing have generally replaced former industrial/business uses or small scale warehouses.

4.3.3 Although there has been a modest net gain in employment floorspace it is likely that that there will have been a net loss of employment in terms of workers. This is because much of the floorspace gained is for data centre use and some office buildings have been lost. Data centre uses generally employ fewer people per unit of floorspace compared to normal office or industrial uses.

4.3.4 In 21/22 there was a net loss of 12,000 of floorspace and the general trend since 2015 has been a gradual loss of employment floorspace.

4.3.5 It should be noted that the above figures do not reflect any new development involving less than 1,000 sqm (minor development). They also do not reflect the closure of part of the Queensmere shopping centre nor the demolition of the former Sainsburys store on Farnham Road.

4.3.6 Regarding the definition of uses, it should be noted that under the Use Classes Order of August 2021, the new use class E (commercial and business services) covers a wide range of uses such as offices, restaurants, retail and leisure plus some industrial and warehouse uses. These used to be categorised separately such as B1a offices, B2 general industry and B8

warehousing. This report identifies the separate uses by name where it is obvious that use is intended on completion. However, the current Use Classes Order provides for more flexibility for changing use without express planning permission including changes within the wide ranging class E. The Government is increasingly using changes to Use Class order and Permitted Development rights to stimulate economic growth.

4.4 Slough Trading Estate and the Simplified Planning Zone (SPZ)

4.4.1 Slough Trading Estate has benefited from being in single ownership of SEGRO. This has enabled co-ordinated and phased management and redevelopment, and for example the application of a Simplified Planning Zone since 1995.

4.4.2 SEGRO's Slough Trading Estate Limited reports having 581,845sqm of lettable space with 97.3% Occupancy, and the second-largest hub of data centres in the world (SEGRO 2022 Annual Report).

4.4.3 The SPZ is a planning tool which is used across the majority of the Slough Trading Estate to support economic development and encourage investment through simplifying the planning approval process for new industrial buildings. It effectively grants planning permission if all conditions are met.

4.4.4 "Responsible SEGRO" is a part of SEGRO's economic model on the estate. It focuses on three strategic priorities for business, environmental and social value: championing low-carbon growth; investing in local communities and environments; and nurturing talent. Designed to promote 'work packages' to local businesses, their 22 Annual report quoted over £1.5 million was invested into the local economy. Due to the success of this pilot, they will roll out similar programmes during 2023. They have also piloted one of their first 'vertical' industrial units 'V-Park' at Leigh Road.

4.4.5 Karl Storz, the world's leading endoscope manufacturers, has a sales and distribution centre for their UK business on the Estate. In 2021 they added their Training and Technology Centre within their premises, to enhance their training facilities for surgical skills.

4.4.6 The current SPZ was adopted in 2014 and expires in 2024. In March 2022, Cabinet agreed to the Council working with SEGRO to develop a new SPZ and to notify the Secretary of State for Levelling Up, Housing and Communities of the Council's intention to do so. The new SPZ will have an area of 162.3 ha, which is a slight increase from 156ha from the currently adopted SPZ.

4.4.7 Two SPZ schemes were completed and six permitted in 2022/23 are listed below. In addition, it should be noted that a new data centre at 650-660 Ajax Avenue for 11,176 sqm scheme (ref T/153) is nearing completion.

Table 5 SPZ schemes completed in 2022/23

Ref	Address	Description
T/149	580 Ipswich Rd	Construction of a three storey 11,176 sq. m data centre for colocation uses with a footprint of 49.8%.
T/152	110 Buckingham Avenue	Proposed development: demolition of 110 Buckingham Avenue (6190 sq. m) and the construction of a new data centre facility of 24,878 sq. m over three floors and plant at ground floor level.

Table 6 SPZ schemes permitted in 2022/23

Ref	Address	Description
T/154	160-161 Bestobell Road	Change of use to allow a fibre exchange/data centre (Sui Generis) in addition to the permitted Class B1(C), B2, B8 as well as the installation of two generators, air conditioning units, louvered screening, new fencing and a new gate with a total footprint of 33.8%. No change to the number of existing car parking spaces.
T/155	317-320 Farnham Road	Single building for B8 use with ancillary offices
T/156	2 Buckingham Avenue	Amendments to existing building and plant
T/157	108 Oxford Avenue	Installation of PV Panels to the roof
T/158	111-113 Buckinghamshire venue and 460 Malton Avenue	Proposed development: Single building of 17,100.6 sqm for colocation / Data Centre use with three floors plus 1 floor of plant with 40.8 % footprint.
T159	485 Berkshire Avenue	Proposed development: Single building of 18,792 sqm for colocation / Data Centre use with three floors plus 1 floor of plant with 48% footprint

4.5 Office market and development

4.5.1 In the year 22/23, two office buildings were lost to residential use (6,572 sqm) and one small one is now in education use. No new independent office buildings were completed but new warehouse and datacentre buildings include some ancillary office space. There is an outstanding planning permission for the second Future Works office on Wellington Street but there is no indication that it will commence soon. And no other major independent offices are under

construction.

4.5.2 The Thames Valley and South-East Office Market Report (2023) produced by Lambert Smith Hampton shows that Slough has 6.5 year's supply of office floorspace with 8385 sqm of available in 2022. Both figures are higher than the previous year. Headline rents are similar to those of the last few years.

4.5.3 The Slough office market was one of the hardest impacted in the South East due to the pandemic. The snapshot below shows the low levels of office take up since 2018 but there is some activity in the market with some take up of empty office space. However, some of that relates to an office at Ditton park just beyond the Borough boundary.

4.5.4 Most of the office space available in Slough is good quality Grade A or B. There is only a limited supply of grade C office space. This is probably the result of many older offices having been converted to residential use.

5 Retail and town centre

5.1 Key facts

- Slough Town Centre has a reduced retail and leisure offer due to the partial closure of the Queensmere shopping centre in January 2022
- District Retail centres in Langley and Farnham Road are thriving due to a more specialised offer.

- Since September 2020, Use Class A1, A2 and A3 have been replaced by E(a) (shops), E(b) (restaurants and cafés), E(c) (financial and professional services). A4 and A5 are now sui generis uses. These use classes will be used in future annual monitoring reports.

5.2 Slough Town Centre

5.2.1 Slough has a declining retail offer and the future of the shopping centre is uncertain. It is recognised that Slough will no longer be a sub-regional shopping centre and there will be a significant reduction in the amount of retail floorspace in the town centre.

5.2.2 The Queensmere shopping centre was partly boarded up in January 2023 which reduced retail space in the town centre. The outline application for redevelopment of the Queensmere shopping centre was agreed in principle in November 2022, for the demolition of buildings and the phased redevelopment of the site to provide a mixed-use scheme comprising residential floorspace (C3 use and provision for C2 use); flexible town centre uses floor space (Use Class E and Use Class F), provision for office floorspace (Use Class E (g) (i)), supporting Sui Generis town centre uses (including a range of the following uses: pubs, wine bars, hot food takeaway), Sui Generis leisure uses (provision for a cinema or live music venue). This reduces the amount of retail floorspace in the town centre

5.2.3 A retail survey was undertaken in February 2023. The results showed an overall Slough Town Centre vacancy of 22%. This is particularly high due to high levels of vacancies in the shopping centres. The Town Centre retail vacancy survey counts the number of vacant units in the designated primary and secondary retail frontages in Slough Town Centre. The most recent survey in 2023 showed Slough Town Centre had a vacancy rate of 22%. This is mainly due to the large number of retail unit vacancies in the shopping centres. The high street has a low retail vacancy rate and a good range of shops, restaurant and café.

- The Queensmere has 51% of units vacant*
- The Observatory has 26% of units vacant.
- The Highstreet has 9% of units vacant.

5.2.4 The 51% Queensmere figure is high as half of the shopping centre closed in January 2023.

5.2.5 In addition, the retail vacancy rate does not reflect the quality of the retail offer. Many of the units in the shopping centres and high street have no signage or permanent shop fit out. These are pop ups which are temporary/short term lets.

5.2.6 There has been a loss of national chain stores in Slough town centre (the High Street Wilkinson store closed in late summer 2023). There has however been an increase in small independent businesses such as takeaways and restaurants, and local grocers selling fresh vegetables and other products to suit the local population's demographic.

5.3 District Centres

5.3.1 In contrast to Slough town centre, the Farnham Road and Langley district centres are thriving which offer a more specialised offer. These along with a series of neighbourhood centres and local parades (see Core Strategy Appendix 4) provides accessible local services for the

community.

5.3.2 Retail vacancy surveys were conducted in Slough district centres at Langley, Farnham Road and Chalvey neighbourhood Centre.

5.3.3 Chalvey neighbourhood Centre had a retail vacancy rate of 11%, Langley and Farnham Road District Centres both had a vacancy rate of 2%.

5.3.4 This are low retail vacancy rates which show these centres are healthy and vibrant. The former Sainsbury in Farnham Road has been demolished and replace with a storage facility. The centre, like Chalvey, benefits from a large independent supermarket.

5.4 Retail Parks

5.4.1 Retail parks will be monitored, and retail vacancy survey undertaken in future annual monitoring report as these provide valuable services and retail offer to local communities. These are very vibrant retail parks with a range of town centre uses such as shops, restaurants, coffee shops. A retail vacancy survey will be undertaken in 2023 as a baseline for the 2024 Retail Vacancy survey.

5.5 Slough Town Centre Business Improvement District (Slough BID)

5.5.1 A Business Improvement District (BID) is a geographical area in which the local businesses have voted to invest together to improve their environment.

5.5.2 A Business Improvement District (BID) is a business-led and business-funded limited company, created through a ballot process, to improve a defined area in which a levy is charged on all business rate payers in addition to their normal business rates bill. The BID is funded primarily through this levy but can also draw on other public and private funding streams, using its resources to develop projects that are intended to provide additional services or improvements to the local area.

5.5.3 [Slough BID](#) was established following a successful ballot in 2020 and contains over 400 businesses. The Slough BID will be due for renewal in 2025. The BID is focused on delivering projects within the 5 themes prioritised by the businesses, with the team working closely with the Council:

- Safe and Secure: Helping to deal with crime and anti-social behaviour in the town centre
- Environment: Creating a clean and pleasant environment
- Marketing and Events: Promoting Slough as a welcoming, vibrant town Centre with events for everyone.
- Business Support: Training and networking opportunities, cost reduction through joint procurement and customer loyalty schemes.
- Representation: Being the voice for business, representing business interests and working with other organisations to get the best for the town.

6 Appeals submitted to the Planning Inspectorate

6.1 Key facts

- 41 Appeals decisions received, 32 dismissed, 9 allowed

- 16 of these concerned strategic matters for the Local Plan regarding housing
- 7 appeals related to enforcement action, with 6 enforcement notices upheld

6.2 Number of appeals

6.2.1 Appeal decisions are reported to Planning Committee on a regular basis (see Planning Committee Agenda items on the Council’s website hyperlink [here](#)). The AMR looks at whether there are any lessons to be learnt from appeal decisions. There were 41 appeal decisions received in Slough in the 12 months from April 2022 to March 2023. 32 were dismissed and only 9 allowed by Inspectors.

6.2.2 Enforcement appeals are important as they demonstrate where breaches are being made. At present resources limit the number of cases the enforcement officer can investigate, but the reports of appeals remain useful as an indicator. Appeals are important to demonstrate both the need for the policy to protect family housing, and its premise that housing need is being met and supply is being provided in a way that is not recorded in housing completions.

6.2.3 This table records appeal decisions made between April 2022 and March 2023.

Table 7 Appeal decisions

Number of appeals on Local Plan strategic matters – (housing, employment)	Number of appeals on householder/advertisements	Core Policies or Saved Policies referred to.	Total No. of appeals
16	25	EN1, EN2, H14, H15, OSC15 Slough Local Plan, 2004. CP8, CP3, CP4, CP8, CP7 of Core Strategy, 2008	41

6.3 Appeals Allowed

6.3.1 Of these 41 appeals (22%) were allowed by Inspectors (i.e. the Planning Application refusal was overturned to an approval). 25 of the appeals that were allowed related to non-strategic matters which were householder /advertisement applications. These were regarding local design, character of the area or amenity or advert controls which are site and application specific judgements.

6.4 Appeals relating to adopted housing and employment policies.

6.4.1 The existing planning policy approach protects the suburbs from inappropriate

intensification and protects family housing from conversion to flats. It also seeks to protect existing business areas to provide jobs for local people, protect them from loss to housing, and to enable operations and buildings within them that might conflict with residential uses.

6.5 Housing

6.5.1 Evidence in support of this was set out in the Protecting the Suburbs Strategy (2020) that concluded it was not practical, viable, sustainable or desirable to allow any of the family housing in the suburban residential areas to be lost to redevelopment. This is due for example to the high demand for family housing in Slough compared to the small number of new builds that are family housing, and that the majority of new builds are flats.. Further information can be seen in Protection of the Suburbs Strategy (May 2019).

6.5.2 Appeal decision results that test Core Strategy Policy CP4 (Housing Type) have shown that it is a robust and effective policy. A series of successful planning appeals won by the Council demonstrate that the policy is compliant with National Planning Policy Framework and provides the justification for the continued application of this policy in our emerging Local Plan.

6.5.3 There have been several recent planning appeal decisions on planning applications submitted on sites in the suburbs for redevelopment which the Council have won. These development proposals would have resulted in a loss of family accommodation or a negative impact on the character and appearance of the area.

6.5.4 Crucially these decisions show that, even in the absence of a five year housing land supply, the policy continues to be given weight in planning appeal decisions as PINS recognise for example the Planning issues and implications of losing family housing and poor design in Slough.

6.6 Employment

6.6.1 No appeals have been received on refusal of applications to protect employment land. Employment land is critical to help meet the supply of jobs needed for Slough's young population. The various trading estates and retail parks also provide an important source of services for Slough's small business and residential communities, and business rates to support the Council's operations. Employment land is being lost through other changes of use that the Council's Local Plan has no control over (see section 4 on employment). However it is useful to know that the Policy to protect employment land has not been implicated in appeals as support for the strength of the policy where it is applied.

7 Natural and Built Environment

7.1 Key facts

- Slough does not have any nationally significant environmental sites but there is a need to improve the biodiversity and nature conservation value of the environmental assets that already exist in the Borough.
- Parts of Slough fall within the requirement for Burnham Beeches Special Area of Protection under the Habitat Regulations.

- Slough has some high quality parks but an overall a shortage of green infrastructure for the size of its population.
- Salt Hill Park, Pippins Park, and Herschel Park have received Green Flag Awards
- Slough has the highest concentration of data centres in Europe which will make it harder to meet our climate change targets because of their large energy consumption and associated carbon emissions.
- Slough suffers from poor air quality. There are currently 5 Air Quality Management Areas which have been declared due to breaches of the national standard. These are clustered along the A4 in the middle of Slough and around the M4/A4 in the Brands Hill area.
- Environmental issues such as the lack of the greenery, high levels of traffic congestion and limited number of appealing buildings contribute to the poor image of the town as well as having an impact on the health and wellbeing of residents.

7.2 Climate Change

7.2.1 The Council published and adopted a [Climate Change strategy and action plan](#) on 20 December 2021.

7.2.2 The Strategy and Action Plan has five key objectives that aim to address the causes and consequences of climate change in Slough:

1. reducing emissions from our estate and operations
2. reducing energy consumption and emissions by promoting energy efficiency measures, sustainable construction, renewable energy sources, and behaviour change
3. reducing emissions from transport by promoting sustainable transport, reducing car travel and traffic congestion, and encouraging behaviour change
4. reducing consumption of resources, increasing recycling and reducing waste
5. supporting council services, residents and businesses to adapt to the impacts of climate change

7.2.3 The council has set a target of borough-wide carbon neutrality by 2040, with an ambitious stretch target of 2030. This was outlined in [Slough's Climate Change strategy vision](#) in June 2021. This target complies with the UK's national target of net zero emissions by 2050 and a reduction of 78% of emissions by 2035 relative to 1990.

7.3 Burnham Beeches

7.3.1 Burnham Beeches is a Special Area of Conservation; a protected site under the Habitats Regulations (Habitats and Species Regulations 2017). Greater numbers of visitors to Burnham Beeches are causing damage to its sensitive habitat. New residential development in Slough can increase visitor numbers to the Beeches. When considering residential development planning applications the Council has a duty under the Habitats Regulations to address the impact on the Beeches.

7.3.2 A mitigation strategy can address the impact by:

- Treating selected public open spaces as 'suitable alternative natural green space' and
- implementing proposed natural habitat enhancement projects.

with the intention of attracting visitors who might have otherwise gone to Burnham Beeches

7.3.3 The enhancements would be funded by financial contributions from housing developers via Section 106 planning obligations. This would apply to residential development sites within 5.6 km of Burnham Beeches; that area covers the northern and western part of the town including the town centre.

7.3.4 An initial mitigation strategy has been agreed by Cabinet in October 2022 and it involves enhancements to Upton Court Park. A further strategy(s) is proposed to cover other open spaces such that necessary mitigation possibilities are outlined well in advance of expected residential development to which they would be linked.

7.3.5 Two advantages of having a mitigation strategy are:

- Natural England will normally object to planning applications if there is no mitigation strategy in place.
- The enhancements outlined in the strategy benefit Slough's residents and environment rather than fund projects at or around Burnham Beeches.

7.3.6 The principle of having a strategy and associated developer contributions was agreed at the June 2021 Planning Committee. The request for contributions and will be incorporated into supplementary planning guidance in the near future. And together with the strategies can form the basis of a supplementary document in the forthcoming new Local Plan.

7.4 Local Wildlife and Geological Sites

7.4.1 TVERC (Thames Valley Environmental Records Centre) calculates the number of Local Wildlife Sites (LWS) and Local Geological Sites (LGS) that have been in positive conservation management in the five year period from 1st April 2018 to 31st March 2023.

Local authorities are required to report on this information to DEFRA each year as a measure of their success at protecting their local biodiversity. This reporting is known as SDL 160 (Single Data List).

7.4.2 The implementation of positive conservation management, defined as management that contributes to maintaining or enhancing the features of interest for which a site has been selected, has been assessed by Thames Valley Environmental Records Centre (TVERC) across all six Berkshire Unitary Authorities using a standardised methodology which was approved and verified by Berkshire Nature Conservation Forum (now the Berkshire Local Nature Partnership) in 2009.

7.4.3 The figure for Slough for 2023 was 71% (5 out of 7) of Local Wildlife Sites in positive management, which is the same as previous year.

8 Existing Planning Policy Documents

8.1.1 Slough's Core Strategy was adopted in December 2008; Site Allocations adopted in 2010 and saved policies from the Local Plan 2004, Proposals Map 2010. There are also saved policies from the Minerals and Waste Plans. These will remain the statutory Development Plan until the new Local Plan reaches adoption.

8.1.2 More details are available on our [Local Plan page on website](#).

8.1.3 The Local Plan is accompanied by other non-development plan documents, primarily the following.

8.1.4 *Developers Guide*: a Developers Guide, originally adopted by the Council's Planning Committee for development control purposes in November 2008 was updated in 2016/17/18 in respect of affordable housing, drainage, refuse, education contributions, floorspace, viability studies, certain highway fees etc.

8.1.5 *Residential Extensions SPD*: The Residential Extensions Guidelines Supplementary Planning Document (RESPD) was adopted on 11th January 2010. The guidelines have been produced in light of increasing pressures for householders to build larger and more dominant extensions, and the impact of such extensions on both the general street scene and residential amenities within established residential areas of Slough.

9 Duty to Cooperate

9.1.1 The Duty to Cooperate (DtC) was created by the Localism Act 2011. It means that Slough Borough Council must engage constructively, actively and on an ongoing basis with other councils and agencies on strategic cross-boundary matters. The aim is to make sure that planning is joined up across the wider area and make local plans work well together.

9.1.2 Levelling Up and Regeneration Bill (LURB) received royal assent on 26th October, becoming an act. However, most of its provisions rely on secondary legislation and so are not yet in force.

9.1.3 At present the Council responds to consultations with adjoining neighbours regarding housing, employment, transport and statutory service and infrastructure providers such as for Habitat Regulations, water, wastewater, electricity, and health services. Table 8 shows the DTC for 22/23.

Table 8 DTC for 2022/23

Council	Detail	Date
Buckinghamshire	Buckinghamshire Wider Call for Sites	September 2022
West Berkshire	Local Plan review 2036 Employment Land Local Plan review- proposed Submission consultation	June 2022 January 2023
Royal Borough of Windsor and Maidenhead	Wider Growth Study Part 2- published online.	2022-2023

9.1.4 Regular meetings are held with Buckinghamshire, primarily to address the cross border housing land supply shortage, including the Wider Area Growth Study. Meetings have been held on following dates:

- 2nd November 2023

- 21st March 2023

9.1.5 A Duty to Cooperate Members and Directors meeting was held on 24th March 2023.

9.1.6 The Wider Area Growth Study was a joint study commissioned in two parts by RBWM and awarded to Stantec (formerly PBA). Part 1 was published in June 2019. The purpose of this was to define the geographic area of the study and the area of search for accommodating the future housing needs of the Slough, Windsor and Maidenhead core areas. [The report is available online.](#)

9.1.7 WAGS Part 2: potential locations for development was published in September 2022. Part 2 is about balancing need and supply. It first assesses how much land will be required to meet the development needs of the core area to 2039, over and above the supply already identified in emerging plans and their evidence bases. It then identifies and assesses potential development sites in the wider area of search that could fill that gap in supply. This search is for strategic sites, leaving out smaller-scale development opportunities. [This report is available online.](#)

10 Slough new Local Plan

10.1 Slough Local Plan

10.1.1 Slough's new Local Plan will set out a vision for the borough and the approach to development over a 20-year period. It will set targets for the delivery of different types of development, provide guidance on locations as to where this development will take place, and establish which areas should be protected. It will also set out policies by which future planning applications will be determined.

10.1.2 Progress on the plan has been consistent but impacted by matters outside of its scope such as the proposed 3rd Runway at Heathrow, and the challenges for sustainable development in accommodating demand for jobs and housing (particularly affordable and family homes) within the existing urbanised area. Funding and staff resources have also been a factor.

10.1.3 The Regulation 18 stage effectively concluded with the Preferred Spatial Strategy consulted on in November 2020, and the proposed release of selected Green Belt sites for family housing consulted on in November 2021. Reports on these were presented to Planning Committee.

10.1.4 The 5 key components of the proposed Spatial Strategy can be summarised as follows:

- **Delivering** major comprehensive redevelopment within the "Centre of Slough";
- **Selecting** other key locations for appropriate sustainable development;
- **Enhancing** our distinct suburbs, vibrant neighbourhood centres and environmental assets;
- **Protecting** the "Strategic Gap" between Slough and Greater London;
- **Promoting** the cross-border expansion of Slough to meet unmet housing needs.

10.2 Local Development Scheme (LDS)

10.2.1 An LDS sets out a timetable for the production of new or revised planning documents (such as a Local Plan) by the Local Planning Authority. It is effectively a programme plan for the preparation of a local plan. The Planning and Compulsory Purchase Act 2004 (as amended by the

Planning Act 2008 and Localism Act 2011) requires a Local Planning Authority to prepare and maintain a Local Development Scheme (LDS).

10.2.2 Slough’s Cabinet will review and approve an update of Slough’s LDS as part of progressing the Local Plan to Regulation 19. At present the Council are watching the evolution of changes to the Local Plan process being progressed in the Government’s Levelling Up and Regeneration Bill.

LDS Requirements:

The LDS should state:

- a. the local development documents that will be produced.
- b. the subject matter and geographical area to which each document is to relate;
- c. which documents are to have ‘development plan’ status;
- d. which documents (if any) are to be prepared jointly with one or more other local planning authorities;
- e. any matter or area where there is, or is likely to be, a joint committee;
- f. the timetable for the preparation and revision of the documents

10.3 Progress on the Local Plan

10.3.1 Progress on preparation of the new Local Plan is published on the [Council's website](#).

10.3.2 The work completed so far is as follows:

- Regulation 18 Intention to Prepare a Local Plan January 2015.
- Slough Issues and Options January to February 2017
- Call for Sites January to March 2016
- Consultation on the Call for Sites June 2016
- Proposed Spatial Strategy Dec 2020 to Jan 2021
- Consultation on Proposed release of Green Belt Sites for Family Housing November 2021

11 Monitoring of the 2010 site allocations

	Proposal Address	Proposed Use	Progress April 2023
SSA1	Lynch Hill and Bangle's Spinney	Non-statutory informal nature reserve	Some wildlife management works underway.
SSA2	Britwell and Haymill Regeneration Area	Mixed use: community, retail, residential and public open space	Complete
SSA3	Newbeech, Long Readings Lane, Elderly Persons	Residential (family housing) and or community use	Complete 12/13

Proposal Address		Proposed Use	Progress April 2023
	Home and day centre		
SSA4	Slough Trading Estate (including Leigh Road Central Core Area)	Mixed use: Offices, Research and Development, Light Industrial, General Industrial, Storage and Distribution, Residential, Retail, Food and Drink, Hotels, Conference Facilities, Educational Facilities, Recreation and Leisure Uses.	Outline planning permission granted 18/06/12. Application lapsed

SSA11	Slough Town Hall	Mixed use: residential, community, education, commercial, non-residential institution	Completed school and residential complete.
SSA12	Land South of Stranraer Gardens	Non-statutory informal nature reserve	None
SSA13	Heart of Slough	Comprehensive regeneration for residential, offices, hotel, bus station, library, retail,	Transport improvements completed and bus station complete 11/12. Library complete. One office building

Proposal Address		Proposed Use	Progress April 2023
		restaurants and cafes, drinking establishments, education, leisure, associated changes to the road network, improvements to the public realm and parking.	complete, a second one has permission. Hotel and residential on former Library site complete. Main site (former university/NW Quadrant) demolished; Pre app discussions held for redevelopment.
SSA14	Queensmere and Observatory Shopping Centres	Mixed use: retail, leisure, residential	Outline application agreed by Planning Committee for Queensmere site.
SSA15	Upton Hospital, Albert Street	Medical and Healthcare uses	Occasional discussions with NHS. Likely to include some new residential alongside new/retained health care facilities.
SSA16	Post Office Sorting Office, Wellington Street	or mixed use: business and residential	No progress to date
SSA17	Slough Canal Basin, Stoke Road	Mixed use	Planning Application agreed by Planning Committee (granted permission post April 23). Council likely to sell its part of site.
SSA18	Former Arbour Vale School, West Wing, St. Joseph's playing field, Stoke Road	– Development of secondary school and community sports stadium	Complete
SSA19	Play Area off Moray Drive	residential development	Complete
SSA20	Wexham Park Hospital, Wexham Road		Partial redevelopment scheme complete. Residential element may be introduced.
SSA21	Halkingcroft Wood, Middlegreen Road		No progress

	Proposal Address	Proposed Use	Progress April 2023
SSA22	BT Site and 297 Langley Rd	Residential	Complete
SSA23	Part of Langley Business Centre, 11/49 Station Rd, Langley	Retail	Planning permission granted for data centre and some limited residential. Existing buildings being demolished.
SSA24	Land west of Hollow Hill Lane, Langley		No progress. Most of site needed for proposed Western Rail Link to Heathrow – rail infrastructure plus flood mitigation land.
SSA25	Old Slade Lake, Orlits Lake and Colnbrook west, Lakeside Road, Colnbrook		No progress. Site affected by Heathrow third runway proposal.

12 Selected Key Locations

12.1.1 Core Policy 1 (Spatial Strategy) provides for relaxation of Core Policy land use policy (existing business area or shopping areas) if certain objectives are met. The Site Allocations DPD identified 4 areas where this policy could apply. Progress on implementation is below:

- SKL1 Sites at Bath Rd Cippenham (relaxation of loss of existing business area)
2 planning applications for primarily residential development being considered. Other sites remain in business/retail use)
- SKL2 Chalvey High St (Ladbrooke Rd) (relaxation of loss of existing shopping area)
Site redeveloped for education and community uses combined with adjacent site SSA 9 (former community centre)
- SKL3 Stoke Road and Mill St (relaxation of loss of existing business area)
Several residential redevelopment or change of use schemes have been completed. Developer interest in redevelopment of 3 more sites.
- SKL4 Former Langley Oil Terminal/Railway Station car Park off Station Rd (relaxation of loss of existing business area)

Most of the site remains in employment uses – open yard uses.

12.1.2 Details of each of the Selected key locations (SKL) can be found in this document here www.slough.gov.uk/downloads/file/2274/development-plan-site-allocations

13 Minerals and Waste

13.1.1 Slough's view is at present that planning on minerals and waste issues can be addressed through the existing saved policies, NPPF, and Preferred Areas and liaison with the Berkshire and other Authorities on their strategies.

13.1.2 We have decided not to prepare a new Minerals Plan for Slough at this stage because there are very few remaining sites for gravel extraction left in the Borough. We have also decided not to prepare a Waste Plan as we have sufficient capacity for Slough with the Energy from Waste plant in Colnbrook

13.1.3 The Council is also a member of the South East Waste Planning Advisory Group (SEWPAG). That monitors sub-regional issues including potential impacts from London.

13.1.4 The National Planning Policy Framework was published in March 2012, updated in 2018, 2019 and 2021. This Council has incorporated Saved Minerals Local Plan policies into a Composite Local Plan published in July 2013. As a result the adopted Minerals Plan remains the Berkshire of 1995 (revised in 1997 and 2001) and the Waste Plan Minerals remains the Berkshire Plan of 1998.

13.1.5 Slough BC has historically had its extensive mineral extraction on green belt land. These have now been largely restored. The remaining parts of Slough are built up. There are no further large-scale reserves available in Slough. As a result Slough is at less risk compared with elsewhere in Berkshire to meet future needs of the region. In Waste Planning terms, Slough BC has a relatively small percentage of Municipal Solid Waste going to landfill and conversely a relatively high proportion of MSW going to Energy from Waste.

19	38/39		329			825
20	39/40		212			825
21	40/41		152			825
totals		1355	9461		1219	17424

Note re projected homes figures

Net additional homes projected figure of 9,641 calculated from a list of major housing sites (Akzo Nobel site excluded) discounted as follows; an assumed lapse/non implementation rate of 10% over first 5 years and 20% for remainder of plan period. And 60/year small sites estimate added.

Annual projected figure is rolling average calculated over a 3 year period inclusive of year before and after. Trajectory sites and phasing to be reviewed/refined when further information received from developers/owners

Note re Local Housing Need

As at 1/4/23 LHN minus Net Additional Homes=LHN remaining

17,424 – 1,355 = 16,069 LHN for remainder of plan period (18 years) after 1st April 2023. Equivalent to 893/year average.

LHN for remainder of plan period minus projected net additional homes equals likely shortfall. 16,069 - 9,461 = 6,608 shortfall.
