COMMERCIAL AND CONTRACT MANAGEMENT		
Structure and resources		
Area 1: Planning and governance	Preparing for contract management and providing oversight	
Key questions	Evidence	Conclusions/ Recommendations
1.1 There is a planned transition from the tendering/contract award phase to the contract management phase, and a handover to contract manager; the cost of contract management is included in the business case and budget		
1.2 Contract ownership is clear, with the budget holder, senior responsible		
owner (SRO), and contract manager clearly defined; there is continuity of governance as far as possible.		
1.3 There are well defined processes and a clear contract management plan, with a focus on outputs and a 'whole life' approach to performance		
1.4 Overall ownership of contract management across the organisation is clear, with a 'contract management senior responsible owner' with responsibility for		
driving organisation-wide contract management performance		
1.5 Contract management processes are aligned with, among others, wider organisational governance processes, operational boards, and risk structures		
1.6 Contract management issues and performance are reported through the governance structure with senior level engagement		
1.7 Regular assessment and evaluation takes place to ensure that the cost of contract management		
activities is justified and proportionate to the benefits obtained.		
1.8 Knowledge management is embedded, capturing key data and lessons from		

ΑF	P	E٢	VΓ)I	X	Δ

contract management process and experience both within the organisation and	
more widely.	
1.9 Professional contract management guidance is developed, or identified	
from external sources, and made available to contract managers.	

COMMERCIAL AND CONTRACT MANAGEMENT Structure and resources		
Area 2: People	Ensuring the right people are in place to carry out the contract management activities	
Key questions	Evidence	Conclusions/ Recommendations
The contract manager		
(or contract management team)		
2.1 The contract manager has continuity (ideally		
through involvement during the tendering/contract		
award processes) and a handover from the staff		
responsible for the tendering/contract award.		
2.2 The contract manager has a detailed knowledge		
of the contract and other relevant issues, such as		
service level agreements, and ongoing supplier		
performance		
2.3 The contract manager has the appropriate skills		
(both specific contract management skills and more		
general commercial awareness and expertise), with		
access to relevant training and development.		
Experienced contract managers are utilised on key		
contracts.		
2.4 Contract managers have accurate job		
descriptions, roles are positioned at an appropriate		
level and		

procurement community.	
procurement community.	
the wider government contract management/	
good practice. The community also plays a role in	
'community' allowing contract managers to share	
2.9 The organisation has a contract management	
enough staff to carry out the required activities	
(primarily but not exclusively its cost), and there are	
in proportion to the importance of the contract	
2.8 Contract management is adequately resourced,	
life of the contract to meet specific needs	
skills; the teams may vary in composition over the	
brought together, with an appropriate range of	
2.7 Balanced contract management teams are	
Wider staff issues	
authority to manage the contract effectively	
2.6 The contract manager has appropriate delegated	
through reviews and appraisals.	
reporting lines and their performance is managed	
2.5 Contract managers have clear objectives and	
management staff.	
salary, and there is a career path for contract	

COMMERCIAL AND CONTRACT		
MANAGEMENT		
Structure and resources		
Area 3: Administration	Managing the physical contract and the timetable for making key decisions	
Key questions	Evidence	Conclusions/ Recommendations
3.1 Hard copy contracts are stored and logged, and are ear accessible when required; for complex contracts, a summary and/or contract operations guide is produced		
3.2 Contract management software is used for recording key information, to give, for example, search capability; relevant ongoing contract management information and documentation is retained and managed.		
3.3 There are mechanisms in place for identifying key contract 'trigger points', such as notice periods.		
3.4 There is regular and ad hoc reporting of contract management information.		
3.5 There are mechanisms in place for handling administration around contract closure or termination.		
3.6 The customer considers the cost of contract management activities to the supplier, and the cost is proportionate to the contract size and risk.		

COMMERCIAL AND CONTRACT MANAGEMENT		
Delivery		
Area 4: Managing relationships	Developing strong internal and external relationships that facilitate delivery	
Key questions	Evidence	Conclusions/ Recommendations
Roles and responsibilities		
4.1 The contract manager understands his/her own role and has clear visibility of well-structured roles and responsibilities on the supplier side.		
4.2 The respective responsibilities of the contract manager and the supplier are clear, and potentially defined in a 'joint statement of intent' or similar document.		
Continuity and communications		
4.3 Continuity of key supplier staff is desirable (ideally through involvement during the sales process); where this cannot be achieved, there is a handover from the staff responsible for the tendering process.		
4.4 Both regular structured and informal communication routes between the contract manager and supplier are open and used; customer and supplier staff are co-located where appropriate.		
 4.5 Users are given clear expectations and an understanding of the contract and the services/ performance to be delivered (for example, through newsletters or briefings). 4.6 Communications between the contract 		
<u> </u>		

Δ	P	P	F	N	D	IX	Δ
$\boldsymbol{-}$			_		$\boldsymbol{\mathcal{L}}$		$\overline{}$

the contract and others such as technical experts)	
are effective; and stakeholders are involved in	
contract management processes where	
appropriate.	
4.7 Problem resolution processes are well defined	
and used, and are designed to ensure minor	
problems do not escalate and cause relationship	
issues; a 'blame culture' is avoided (for example,	
through the use of a 'relationships charter' or	
similar document).	

COMMERCIAL AND CONTRACT		
MANAGEMENT		
Delivery		
Area 5: Managing performance	Ensuring the service is provided in line with the contract	
Key questions	Evidence	Conclusions/ Recommendations
Service delivery		
5.1 Service management is well structured;		
baselines are understood by both parties, and		
suppliers		
understand the service they are required to		
deliver. The contract manager ensures that the		
customer organisation provides the supplier with		
the information and contacts needed to deliver		
the service.		
5.2 A performance management framework is in		
place when the contract is signed. The framework		
is comprehensive, objective and provides		
incentives for the supplier to meet or exceed		
agreed performance standards.		
5.3 Service levels agreements are in place, and are		
linked to business needs, understood by the		
supplier, and monitored by the contract manager		
and/or end users.		
5.4 Supplier performance is assessed using clear,		
objective and meaningful metrics, linked where		

appropriate to the Office of Government	
Commerce's 'Common Assessment Framework' for	
monitoring suppliers.	
5.5 Reporting is as far as possible on a focused, 'by	
exception' basis, with supplier self-measurement	
and reporting where appropriate but with	
independent checking mechanisms to alert the	
customer to performance issues (for example, user	
feedback).	
5.6 Clear processes are in place to handle	
operational problem resolution and resolve issues	
as quickly as possible.	
5.7 Where appropriate, user compliance with the	
contract is monitored and managed to ensure	
maximum operational effectiveness and value for	
money.

issues and adherence to key contractual	
requirements, for example, on data security	

COMMERCIAL AND CONTRACT MANAGEMENT		
Delivery		
Area 6: Payment and incentives	Ensuring payments are made to the supplier in line with the contract and that appropriate incentive mechanisms are in place and well managed	
Key questions	Evidence	Conclusions/ Recommendations
Payment and budgets		
6.1 Payment mechanisms are documented and are clear and well understood by all parties (including incentives, penalties, and non standard charges).		
6.2 Payment processes are well defined and efficient; appropriate checks and authorisation processes are in place for paying invoices.		
6.3 The costs of the services delivered and contract management costs are mapped against budgets and allocated appropriately.		
6.4 Payment changes after the contract is let, for example from contract variations or benchmarking/ market testing, are made using contractual provisions and demonstrated to		
provide value for money. Payment and incentive mechanisms		
6.6 Service credits or equivalent mechanisms are		

well managed and governed, and proportionate to	
supplier profitability.	
6.7 Where open-book or similar financial/pricing	
mechanisms are used, the process is managed	
professionally and fairly.	
6.8 The contract manager takes action where	
necessary to avoid the organisation being 'locked	
in' to	
onerous commercial terms throughout the	
contract period, such as price escalation or	
'compulsory'	
maintenance payments	

COMMERCIAL AND CONTRACT		
MANAGEMENT		
Delivery		
Area 7: Risk	Understanding and managing contractual and supplier risk	
Key questions	Evidence	Conclusions/ Recommendations
Processes and plans		
7.1 Contractual/supplier risk management is in		
place with clear responsibilities and processes,		
identification of who is best placed to manage risk,		
and supplier involvement where appropriate.		
7.2 Risks are formally identified and monitored		
regularly, with mitigating actions developed and		
implemented where possible, and 'obsolete' risks		
removed from consideration where appropriate.		
7.3 Escalation and reporting routes are in place for		
risk governance.		
7.4 Contingency plans are developed to handle		
supplier failure (temporary or long-term		
failure/default); exit strategies are developed and		
updated through the life of the contract.		
Contractual terms		
7.5 Contractual terms around termination are		
understood and monitored by the contract		
manager.		
7.6 Contractual terms around warranties,		
indemnities and insurance are understood and		

monitored by the contract manager. 7.7 Contractual terms around security and confidentiality are understood and monitored by the contract manager, particularly issues relating to the security/confidentiality of personal data. 7.8 Dispute resolution processes are in place, including agreed adjudication procedures, mediation, and arbitration Ongoing supplier risk management 7.9 The contract manager monitors the supplier's financial health and business performance (including through the use of credit rating agencies). 7.10 The contract manager monitors the supplier's compliance with contractual 'non-performance' issues (for example, on tax and sustainability targets)		T

COMMERCIAL AND CONTRACT		
MANAGEMENT		
Development		
Area 8: Contract development	Effective handling of changes to the contract	
Key questions	Evidence	Conclusions/ Recommendations
Change processes		
8.1 The contract is regularly reviewed (with a view to updating where necessary) to ensure it meets evolving business needs.		
8.2 Processes are in place that clearly lay out the governance of contractual change – who needs to approve what and how it will happen – with a focus on effective and prompt change implementation.		
8.3 There are clear processes for the management of minor changes and contract variations, with a focus on the cost/effort being proportionate to the importance and value of the change.		
8.4 There are more rigorous processes to handle major contractual changes, including clear approval mechanisms and accountabilities, and controls to demonstrate that changes offer value for money.		
8.5 Where appropriate, value for money testing of existing services takes place through benchmarking or other processes.		
8.6 There are processes to cover the introduction of new services under the contract, including		

market	
testing where necessary.	
8.7 Dispute handling processes are in place to	
handle change related issues	
Processes for different types of change	
8.8 Both parties have a clear understanding of the	
arrangements for any extension of the contract	
(both scope and time) and related issues.	
8.9 Processes are in place to handle commercial	
(financial) changes to the contract in a fair and	
structured manner.	
8.10 Price changes are managed fairly and	
effectively with the use of mechanisms such as	
benchmarking, competitive tendering (for	
example, for major additional works), or other	
techniques such as open book pricing as	
appropriate, to test value for money.	
8.11 The rationalisation of specifications and	
demand management are considered as options to	
achieve better value for money.	

COMMERCIAL AND CONTRACT		
MANAGEMENT		
Development		
Area 9: Supplier development	Improving supplier performance and capability	
Key questions	Evidence	Conclusions/ Recommendations
Processes		
9.1 Processes are in place that clearly set out how supplier development activities will be planned, managed and governed.		
9.2 Clear processes for benefits measurement and capture are in place to ensure that		
supplier development is focused on continuous improvement and achieving value for the customer organisation.		
9.3 The customer organisation understands what motivates and drives the supplier and how supplier development fits with the supplier's goals		
Improvement activities		
9.4 Supplier operational performance improvement activities (for example, 'Lean' and '6-sigma'), with potential input or assistance provided by the customer organisation.		
9.5 Joint working or shared activities between the two parties for the benefit of both the supplier and customer (for example, process improvement, shared training, task forces or joint project teams).		
9.6 Supplier improvement activities relating to wider government initiatives, with input or		

assistance provided by the customer organisation	
(for example, on sustainability, disability	
employment issues, use of SMEs (Small and	
Medium Sized Enterprises) and BMEs (Black	
Minority Ethnic suppliers)).	
9.7 Shared risk reduction programmes or activities.	
9.8 Supply chain development activities (for	
example, the development of second/third tier	
supplier performance).	
9.9 Shared management activities (for example,	
supplier boards) to drive performance	
improvement.	

COMMERCIAL AND CONTRACT		
MANAGEMENT		
Strategy		
Area 10: Supplier relationship	Having a programme for managing and	
management	developing relationships	
management	with suppliers	
Key questions	Evidence	Conclusions/ Recommendations
10.1 A supplier relationship management programm		
and structured with appropriate		
governance and senior ownership.		
objectives		
10.2 A benefits realisation plan is in place for		
supplier relationship management; there is a clear		
sense of		
what value is to be generated for both parties.		
10.3 There is a focus on capturing innovation from		
the supplier where necessary or valuable.		
10.4 Knowledge management issues are		
addressed, including knowledge capture from		
suppliers.		
10.5 The supplier relationship management		
programme considers all the supplier's interactions		
across an organisation and on a pan-government		
basis, including work with the Office of		
Government Commerce.		
10.6 Board level supplier/customer organisation		
interfaces and relationships are planned and		
managed in line with overall supplier relationship		
management.		

COMMERCIAL AND CONTRACT		
MANAGEMENT		
Strategy		
Area 11: Market management	Managing the wider market issues that impact on the contract, but lie beyond the supplier	
Key questions	Evidence	Conclusions/ Recommendations
11.1 Processes are in place to evaluate and review of around delivering services in-house or outsourcing.		
11.2 Market intelligence is used to maintain an		
understanding of the market and of alternative		
suppliers (to inform benchmarking, contingency		
planning and re-competition strategies).		
11.3 The capacity and capability of potential		
suppliers is analysed, and linked to wider		
government analysis, for example, by the Office of		
Government Commerce		
11.4 There is ongoing evaluation of emerging		
technologies and practices, and identification of		
opportunities from both immediate and parallel		
market sectors.		
11.5 Market making is undertaken where		
appropriate to stimulate competition and ensure		
the requirements can be delivered by the market;		
there is an understanding of issues such as switching and bidding costs.		
11.6 A re-competition strategy and plan is put in		
place in a timely manner; the contract manager		
feeds into strategy development for the 'new'		
procurement.		
procurement.
