

## Appendix C – Equality Impact Assessment

### SUMMARY RAG RATING

The outcome of this EIA has been assessed to be:	<b>Amber</b> 
--	---

### SECTION 1:

<b>Title</b>	Review of Council Tax Support Scheme for 2025/26
<b>What are you analysing?</b> <ul style="list-style-type: none"> <li>• What is the policy/project/activity/strategy looking to achieve?</li> <li>• Who is it intended to benefit? Are any specific groups targeted by this decision?</li> <li>• What results are intended?</li> </ul>	<p>Legislation requires the Council to annually review its scheme to decide whether or not to make changes.</p> <p>The proposal is to make changes to the Council Tax Support (CTS) scheme for 2025/26 following a period of consultation with residents and stakeholders.</p> <p>Slough is facing extreme financial pressures, and the CTS scheme for working age claimants is a discretionary scheme. As such, following consideration of a variety of options, the proposal is to reduce the scheme’s gross expenditure by £2.144m a year from 1 April 2025. Due to 17% of the savings being passed onto preceptors, this would result in a saving of £1.779m for the Council. To mitigate the impact a CTS Hardship Fund will be created in 2025/26 to support claimants who may experience financial hardship. It is proposed that £0.175m of the gross saving will be used to fund this along with £0.175m of the Housing Support Fund allocation, so a total of £0.350m in 2025/26. A further £0.175m will be available in 2026/27. The net saving before any allowance for non-collection is £1.604m.</p> <p>This EQIA is to support the Cabinet report which recommends that if Full Council approves the new CTS scheme, there should be an increased CTS Hardship Fund and that a new CTS Hardship Fund Policy will be developed and brought back to Cabinet in March 2025, and recommend for Full Council a new CTS scheme for 2025/26 as appended at Appendix A to come into effect on 1 April 2025.</p> <p>There are currently 6,504 working age households in receipt of CTS, and the proposal will see all these households CTS reduce in 2025/26.</p> <p>State pension age only households are covered by a prescribed national scheme and are therefore not included as part of this proposal. It will only be working age claim households who are impacted, although these households may have pensioners in them either as non-dependants or as mixed age couples.</p>

Slough's current CTS scheme awards a maximum reduction for working age households that are not working of 100%. This is the only scheme across Berkshire to offer this amount of reduction. The proposal is to change this as per the table below:

	Current	Consulted Scheme	Option Following Consultation
Income Bands	Discount off CT	Discount off CT	Discount off CT
	liability	liability	liability
1	100.00%	70.00%	80.00%

		6,504																																							

Household	Number of cases	Lone parent cases	Couple with children cases
1 child	1,324	1,016	308
2 children	1,105	761	344
3 children	588	313	275
4 children	209	94	115
5 children	56	27	29
6 children	24	10	14
7 children	4	1	3
8 children	2	1	1
9 children	1	0	1
10 children	1	1	0
11 children	1	0	1

The impact of the proposed change will not affect pension age people because government have recognised that low-income pensioners cannot be expected to increase their income through paid work and therefore are protected from any reduction in CTS.

**The equality profile of groups on low incomes or in poverty**

Detailed equality analysis of those in receipt of Council Tax Support is not available.

However, as those impacted are either no working or on a low income, it is possible to use national data to understand the equality groups who are most likely to fall into this group.

According to national profiling (1) of those whose income was persistently low or in poverty, those who are on low incomes are more likely to fall in the following groups:

- Age and sex:  
Single parents with children, noting women are more likely than men to be single parents (90%) (2)
- Age:  
Children in families where no one was working.  
Children in families with 3 or more children (1)  
Children under 5, especially in larger families
- Ethnicity:  
Asian/ Asian British head of household and Black/ African/ Caribbean/ Black British head of household (1)
- Disability:  
Adults with limiting health conditions or who are disabled.  
Families living with disabled children (3)  
Unpaid carers were 50% higher more likely to be in poverty (4)
- Gender identity:

there is less research on people whose gender is different from that assigned at birth, but there is research that people may struggle with housing and (based on London data) live in deprived areas (7)

- Pregnancy:  
earnings are impacted negatively during and after pregnancy.
- Religion or belief:  
People who identified as "Muslim" had the lowest percentage of people aged 16 to 64 years in employment; this resulted from the high percentages of people who were students or looking after home or family in this group.
- Sexual orientation:  
Recent longitudinal research highlights the ways that Lesbian, Gay, and Bisexual people may be more likely to face income inequalities (6)
- Other groups:  
those in social housing (1)

To understand how impacts would affect those on Council Tax Support, a consultation exercise was undertaken. 280 people responded, 90% of whom were in receipt of Council Tax Support and equality information was collated. Whilst this sample is too small to use to form a profile of those on Council Tax support, it does provide valuable insight into the views of respondents by equality group. Not all groups responded to all equality questions. The response rates are below:

**Number of answers & % of 280 respondents (excluding "prefer not to say" responses):**

Age: 267, 95%

Disability: 249, 89%

Caring responsibilities: 253, 90%

Ethnicity: 233, 83%

Pregnancy: 264, 94%

Religion: 222, 79%

Sex: 257, 92%

Gender identity: 258, 92%

Sexual orientation: 231, 83%

Been in care: 258, 92%

Equality Characteristic	Slough population	Over-represented or Under-represented relative to overall size in local population?
Sex	The population of Slough is 158,500, with 80,005 females (50.5%) and 78,495 males (49.5%)	The consultation results showed that only 35.02% of respondents who provided their Sex as registered at birth were male. This is a lot lower than Slough's male/female population figures. 64.98% of respondents who provided their Sex as registered at birth were female. That is a lot higher than Slough's male/female population figures show.
Ethnicity	Slough's ethnic groups are 74,093 Asian, 57,134 White, 11,992 black, 7,144 other, 6,311 mixed, and 1,826 Arab	The largest ethnic group of respondents to the consultation at 43.57% were White. The next highest group was Asian or Asian British: Pakistani at 13.93% followed by Asian or Asian British: Indian at 7.86%.
Disability	The total Disabled population in Slough is 17,975 or 11.3%, of which, 7,880 or 5% have day-to day activities limited a lot, and 10,095 or 6.4% have day-to-day activities limited a little	The consultation had 39.3% not declaring any disability and yet 60.7% have declared themselves as having a Disability. 58.37% have stated they are in receipt of a disability benefit. This differs significantly from our live caseload where we have 10.06% in receipt of disability benefit.
Sexual orientation	1.9% of Slough's population identified as an LGB+ orientation	77.86% of consultation respondents identified as Straight or Heterosexual. 3.57% identified as Bisexual, Gay, or Lesbian.
Age	25% of Slough's residents are aged 0-15, 64% are 16-64, and 9.7%	There were no under 18 respondents as you must be over 18 to pay Council Tax. The split was 18-24 2.14%, 25-39 25%, 40-49 25.36%, 50-59 26.79%, 60-69 15.36% and over 0.71%.

		are 65 or over	As highlighted above those on Council Tax Support can also be analysed by those households with children. 3315 of people seeking support have children:
	Religion or belief	Slough has 50,664 Christian, 46,661 Muslim, 20,726 no religion, 17,985 Sikh, 12,343 Hindu, and 8,544 who did not answer	Of the 280 respondents 95 or 33.93% identified as Christian, 67 or 23.93% identified as Islam, 34 or 12.14% as None, 8 or 2.86% as Hindu and Sikh.
	Gender Identity	0.9% identify as a different gender to their sex registered at birth	91.79% of respondents identify their Gender as being the same sex they were registered with as at birth. 0.36% identified it is different.
	Pregnancy/Maternity	Data not available.	2.5% answered yes to being either pregnant or been pregnant in the last 12 months.

**2.2 Are there any groups with protected characteristic that are overrepresented in the monitoring information relative to their size of the population? If so, this could indicate that the proposal may have a disproportionate impact on this group even if it is a universal service.**

From the analysis above we can conclude that the following groups will be overrepresented in groups either currently seeking support or potentially seeking support in the future:

- Age and sex:  
Single parents with children, noting women are more likely than men to be single parents (90%) (2)
- Age:  
Children in families where no one was working  
Children in families with 3 or more children (1)  
Children under 5, especially in larger families
- Ethnicity:  
Asian/ Asian British head of household and Black/ African/ Caribbean/ Black British head of household (1)
- Disability:  
Adults with limiting health conditions or who are disabled  
Families living with disabled children (3)
- Unpaid carers were 50% higher more likely to be in poverty (4)
- Pregnancy:

	<p>earnings are impacted negatively during and after pregnancy</p> <ul style="list-style-type: none"> <li>• Religion or belief: People who identified as "Muslim" had the lowest percentage of people aged 16 to 64 years in employment; this resulted from the high percentages of people who were students or looking after home or family in this group.</li> <li>• Sexual orientation: recent longitudinal research highlights the ways that Lesbian, Gay, and Bisexual people may be more likely to face income inequalities (6)</li> <li>• Other groups: those in social housing (1)</li> </ul>
<p><b>2.3 Are there any groups with protected characteristics that are underrepresented in the monitoring information relative to their size of the population? If so, this could indicate that the service may not be accessible to all groups or there may be some form of direct or indirect discrimination occurring.</b></p>	<p>From the data there are groups who are less likely to be impacted because they are less likely to be on low incomes.</p>

**2.4 Does the project, policy or proposal have the potential to disproportionately impact on people with a protected characteristic? If so, is the impact positive or negative?**

	None	Positive	Negative	Not sure
Men or women	<input type="checkbox"/>	<input type="checkbox"/>	Women are more likely than men to be single parents (90%) (2)	<input type="checkbox"/>
People of a particular race or ethnicity (including refugees, asylum seekers, migrants and gypsies and travellers)	<input type="checkbox"/>	<input type="checkbox"/>	Ethnicity: Asian/ Asian British head of household and Black/ African/ Caribbean/ Black British head of household (1)	<input type="checkbox"/>
Disabled <sup>1</sup> people (consider different types of physical, learning, or mental disabilities)	<input type="checkbox"/>	<input type="checkbox"/>	Disability: Adults with limiting health	<input type="checkbox"/>

<sup>1</sup> Disability discrimination is different from other types of discrimination since it includes the duty to make reasonable adjustments.

			<p>conditions or who are disabled</p> <p>Families living with disabled children (3)</p> <p>Unpaid carers were 50% higher more likely to be in poverty (4)</p>	
People of particular sexual orientation/s	<input type="checkbox"/>	<input type="checkbox"/>	<p>Sexual orientation: A recent longitudinal research highlights the ways that Lesbian, Gay, and Bisexual people may be more likely to face income inequalities (6)</p>	<input type="checkbox"/>
People in particular age groups (consider in particular children, under 21s and over 65s)	<input type="checkbox"/>	<input type="checkbox"/>	<p>Age: Children in families where no one was working</p> <p>Children in families with 3 or more children (1)</p> <p>Children under 5, especially in larger families</p>	<input type="checkbox"/>
People who are intending to undergo, are undergoing, or have undergone a process or part of a process of gender reassignment	<input type="checkbox"/>	<input type="checkbox"/>	<p>People may struggle with housing and (based on London data) live in deprived areas (7)</p>	<input type="checkbox"/>
Impact due to pregnancy/ maternity	<input type="checkbox"/>	<input type="checkbox"/>	<p>Pregnancy: earnings are impacted negatively during and after pregnancy</p>	<input type="checkbox"/>
People of particular faiths and beliefs	<input type="checkbox"/>	<input type="checkbox"/>	<p>Religion or belief: People who identified</p>	<input type="checkbox"/>

				as "Muslim" had the lowest percentage of people aged 16 to 64 years in employment; this resulted from the high percentages of people who were students or looking after home or family in this group.	
	People on low incomes*	<input type="checkbox"/>	<input type="checkbox"/>	This change impacts those on a lower income	<input type="checkbox"/>
<p><b>*People within some equality groups are more likely to be on low incomes (e.g., single parents (mainly women), people with disabilities, some ethnic minority groups etc). This is especially important when you are looking at fees, charges, and access to services.</b></p>					
<b>2.5</b>	<b>Based on your responses, should a full, detailed EIA be carried out on the project, policy, or proposal</b>				
	Yes <input checked="" type="checkbox"/>				
<b>2.6</b>	<b>Provide brief reasons on how you have come to this decision?</b>				
	The modelling has shown that 6,504 non-working age households with low incomes will be impacted by the proposed changes to the scheme.				

**If the answer in 2.5 above is "No" then sections 3 and 4 are not required to be completed.**

### SECTION 3: ASSESSING THE IMPACT

In order to be able to identify ways to mitigate any potential impact it is essential that we know what those potential impacts might be. Using the evidence gathered in section 2, explain what the potential impact of your proposal might be on the groups you have identified. You may wish to further supplement the evidence you have gathered using the table below in order to properly consider the impact.

The Council's Council Tax Support scheme (CTS) consists of two parts. The first part makes provision for non-working age claimants which is prescribed on a national basis and cannot be amended by local authorities. The second part of the scheme makes provision for working-age claimants which the Council do have discretion on.

The Council is proposing to amend its current scheme to provide less support the claimants who are not working and on the lowest working incomes.

All working age claimants due to the proposed changes in the scheme will have to pay more in Council Tax. In mitigation the Council proposes:

- A CTS Hardship Fund of £0.350m in 2025/26 and £0.175m in 2026/27 to provide additional financial assistance to households who experience extreme financial difficulty and are unable to pay their full Council Tax charge.
- Provide debt, welfare, and financial advice to assist households in managing their finances e.g., through a benefit check.
- The Council has an enforcement policy which considers the individual needs of a debtor and will consider delaying collection or writing off a debt in appropriate circumstances.
- The government has announced that the Household Support Fund will continue into 2025/26 to support households who may be impacted by the cost of living. Many of these households will be in receipt of CTS and could therefore receive additional support such as towards food or energy costs through vouchers.
- The Discretionary Housing Payment fund will be available in 2025/26 and will continue to support people in receipt of housing costs who are struggling to manage a shortfall in their rent or housing support.

Protected Group		Positive impact?			Negative impact? If so, please specify the nature and extent of that impact	No specific impact	If the impact is negative, how can it be mitigated? Please specify any mitigation measures and how and when they will be implemented.	What, if any, are the cumulative effects of this decision when viewed in the context of other Council decisions and their equality impacts
		Eliminate discrimination	Advance equality	Good relations				
	Women				Women may be more impacted because they live in single		As well as actions summarised above:  Work with Children's services and the voluntary sector to ensure that	This will be kept under review via a cumulative impact assessment, as full budget is completed for 2025/26.

					parent households, which are more likely to be on low incomes nationally.		mitigating support reaches single parents.	
	Asian/Asian British				Asian and Asian British people are more likely to live in poverty nationally. 28.21% of consultation respondents were from this group -of which, 53.17% were not working and could be impacted.		Work with the voluntary sector to ensure to ensure that mitigating support reaches this population.	As above

	Black/African/Caribbean/ Black British				Black / African. Caribbean and Black British groups are more likely to live in poverty nationally. This group in the consultation response accounted for 5.36% out of which 26.67% were not working and could be impacted.		Work with the voluntary sector to ensure to ensure that mitigating support reaches this population.	As above
<b>Disability</b>	Physical				Disabled people and disabled children are more likely to live on low incomes.  Unpaid carers are 50% higher more likely to be in poverty)  The consultation		Work with the voluntary sector to ensure to ensure that mitigating support reaches this population, and also with relevant Council services – Housing, Children’s, and Adults.	None.

					<p>had 39.3% not declaring any disability and 60.7% declared themselves as having a disability. 58.37% stated they were in receipt of a disability benefit. This differs from the data in our benefits system where 10% are in receipt of disability benefit. 56.64% of respondents stated they were not working so could be impacted negatively.</p>			
--	--	--	--	--	---	--	--	--

Protected Group		Positive impact?			Negative impact?	No specific impact	What will the impact be? If the impact is negative, how can it be mitigated? (action)	What are the cumulative effects
		Eliminate discrimination	Advance equality	Good relations				
<b>Sexual Orientation</b>	Lesbian, gay men, bisexual				<p>Lesbian, Gay, and Bisexual people may be more likely to face income inequalities nationally.</p> <p>This group made up 3.57% of respondents however, 30% declared themselves as not working. 7% declared a partner and 40% declared children.</p>		Work with the voluntary sector to ensure to ensure that mitigating support reaches this population.	Aa above
<b>Age</b>	Pension age people						<p>The impact of the proposed change will not affect pension age people.</p> <p>The government have recognised that low-income pensioners cannot be expected to increase their income through paid work and therefore are protected from any reduction in CTS.</p>	Pension age people will not be affected.

	Working age people				All working age people in receipt of CTS, currently 6,504 will be negatively impacted by this proposal.		Mitigation actions are highlighted above.	As above
	Younger people (16-25)				In order to receive CTS, you need to be aged 18 as you cannot be liable for Council Tax under this age. Looking at the consultation 2.33% declared they were in the age group 18-24 with 66.7% stating they were working.  A group of people in this age group who could be impacted would be care leavers after they turn 25 as up until that age, they are exempt from paying.		Work with the voluntary sector to ensure to ensure that mitigating support reaches this population, and also with relevant Council services – Housing, Children’s, and Adults.	As above
	Children (under 16)				All children under 16 will be impacted if their		Work with the voluntary sector to ensure to ensure that mitigating support	None.

<p><b>Groups with particular faiths and beliefs</b></p>			<p>Religion or belief: People who identified as "Muslim" had the lowest percentage of people aged 16 to 64 years in employment; this resulted from the high percentages of people who were students or looking after home or family in this group.</p> <p>The largest group of respondents were Christians at 33.93%, followed by Muslims 23.93%, Hindu 2.86%, Sikh 2.86%, and Buddhist 1.43%. All faith groups will lose under the new scheme.</p>		<p>Work with the voluntary sector and with the faith sector.</p>	<p>None.</p>
---	--	--	---	--	--	--------------

<p><b>People on low incomes</b></p>			<p>Based on the proposed changes all those currently in receipt will see their CTS reduce. The largest reduction will be for 532 households who are working and in band 1 where the percentage reduces from 75% to 50%. They will need on average to pay £392.25 more each year. The two non-working band 1 groups will need to contribute on average £307 per annum or £5.91 per week.</p>		<p>Mitigating actions outlined above.</p>	<p>None.</p>
-------------------------------------	--	--	---	--	---	--------------

## SECTION 4: ACTION PLAN

4.1	<p>Complete the action plan if you need to reduce or remove the negative impacts you have identified, take steps to foster good relations or fill data gaps.</p> <p><i>Please include the action required by your team/unit, groups affected, the intended outcome of your action, resources needed, a lead person responsible for undertaking the action (inc. their department and contact details), the completion date for the action, and the relevant RAG rating: R(ed) – action not initiated, A(mber) – action initiated and in progress, G(reen) – action complete.</i></p> <p><b>NB. Add any additional rows, if required.</b></p>

## Appendix A

### Equality Impact Assessment Decision Rating Guide

**PLEASE SEE PAGE 1 FOR THE RATING OF THIS PROPOSAL**

<b>Decision</b>	<b>Action</b>	<b>Risk</b>
As a result of performing the EIA, there is a risk that a disproportionately negative impact (direct, indirect, unintentional, or otherwise) exists to one or more of the nine groups of people who share a protected characteristic under the Equality Act 2010. It is not clear if mitigating actions are possible.	<b>Further advice should be taken</b>	<b>Red</b> 
As a result of performing the EIA, there is a risk that a disproportionately negative impact (as described above) exists to one or more of the nine groups of people who share a protected characteristic under the Equality Act 2010. However, this risk may be removed or reduced by implementing mitigating actions.	<b>Proceed pending agreement of mitigating action</b>	<b>Amber</b> 
As a result of performing the EIA, the proposal does not appear to have any disproportionate negative impact on people who share a protected characteristics or anticipated impacts will be either positive or neutral.	<b>Proceed</b>	<b>Green:</b>
